PSDP

## Strategic planning framework

### The vision

The PSDP envisions a responsive, effective and efficient PSS that provides quality statistics for evidence-based decisions towards the attainment of the development goals of the nation.

By 2017, the PSS shall see a significant increase in the use of statistics in government policies, decisions, and actions at the national and local levels towards inclusive growth and reduced poverty in the country.

### The goals

To deliver better quality statistics in support of evidence-based policymaking, program implementation and monitoring

To increase user understanding, capacity, and trust for wider and rational use of statistics

To strengthen statistical governance, coordination, and research and development at the national and local levels

To enhance capacity of MSAs and other data producers at the national and local levels and to strengthen cooperation of respondents and data providers for better quality statistics

To increase investment and institutionalize a sustainable resource mobilization strategy for statistics
