## **FOREWORD**

The Chicken Situation Report presents the industry situation in terms of volume and value of production, number of birds dressed in poultry dressing plants, chicken meat imports, and monthly average farmgate and retail prices.

The Philippine Statistics Authority (PSA) disseminates the Chicken Situation Report annually, every March, with the previous year as the reference period. The report serves as a ready reference for PSA's various clients and stakeholders in the agriculture sector.

The PSA would appreciate comments, and suggestions from our data users, and readers for further improvement of this report.

## TECHNICAL NOTES

The data in this report are collected by the Philippine Statistics Authority (PSA) through the two major surveys, namely:

1. Backyard Livestock and Poultry Survey (BLPS) which covers one of the four replicate samples of the Palay Production Survey (PPS) and Corn Production Survey (CPS). BLPS consists of 15,876 sample households in 1,560 sample barangays nationwide; and
2. Commercial Livestock and Poultry Survey (CLPS) which covers 643 sample layer farms and 845 broiler commercial farms as of January 2019.

Both surveys are conducted simultaneously every quarter, that is, every quarter in all provinces.

Another activity that supplements the statistical requirements of the livestock and poultry sub-sector is the Compilation of Data from Slaughterhouses and Poultry Dressing Plants (CDSPDP). This covers 1,265 licensed to operate meat establishments (LTOMES) and Locally Registered Meat Establishments (LRMEs) nationwide. It is undertaken in coordination with the National Meat Inspection Service (NMIS) and Local Government Units (LGUs).

### Concepts and Definitions

**Backyard farm** refers to any farm or household that tends/raises livestock and/or poultry animals.

**Commercial farm** refers to any broiler or layer farm which satisfies at least one of the following conditions:

- Tending 500 layers or 1,000 broilers; or
- Tending 100 layers and 100 broilers if raised in combination

**Farmgate price** refers to the price received by poultry raisers for their produce at the location of farm. Thus, marketing costs such as transport and other marketing costs (if any) incurred in selling the produce is not included in the farmgate prices.

**Imports** refer to the number of meat products originating from foreign country. The data on meat importation data are compiled by the Trade Statistics Division (TSD) of PSA from the copies of Import Entry and Internal Revenue Declaration collected from the Bureau of Customs (BOC).

**Inventory** refers to the actual number of chicken, in birds, present in the farm as of a specific reference date.

*Continued*

## **TECHNICAL NOTES** -- *Concluded*

**Licensed to Operate Meat Establishment (LTOME)** refers to premises/facilities where food animals are slaughtered for human consumption. These were then referred as accredited slaughterhouses and poultry dressing plants.

**Locally Registered Meat Establishment (LRME)** refers to slaughterhouses, meat processing plants, Poultry Dressing Plants, meat cutting plants, and cold storages that are allowed to operate by the city/municipal government but are not accredited by the NMIS.

**Poultry Dressing Plant (PDP)** refers to premises that are approved and registered by the controlling authority in which poultry are dressed for human consumption.

**Retail price** refers to the prices at which retailers sell their goods or commodities to consumers in the marketplace.

**Value at constant price** refers to the valuation of transactions, wherein the influence of price change from base year to the current year has been removed.

**Value at current price** refers to the value based on prices during the reference year; nominal year.

**Value of production** refers to the value of the animal with reference to its farmgate price. It is derived by multiplying the volume of production by its farmgate price.

**Volume of production** refers to the volume of locally-raised birds disposed for dressing which include birds shipped out for dressing. This is expressed in metric tons, liveweight.

## HIGHLIGHTS

### A. Chicken

#### 1. Volume of Production

##### a. National

Figure 1. Volume of Chicken Production, Philippines  
January-December, 2017-2019<sup>P</sup>

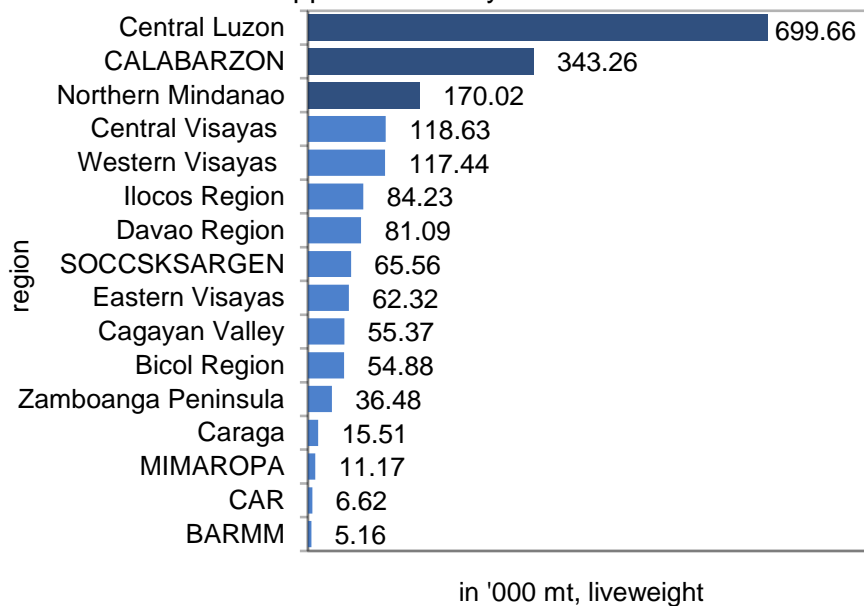

<sup>P</sup>— Preliminary  
Source: Philippine Statistics Authority

The total volume of chicken production in 2019 was 1.93 million metric tons, liveweight. This was 4.9 percent higher than the 1.84 million metric tons, liveweight output in 2018. (Figure 1, and Table 1)

##### b. Regional

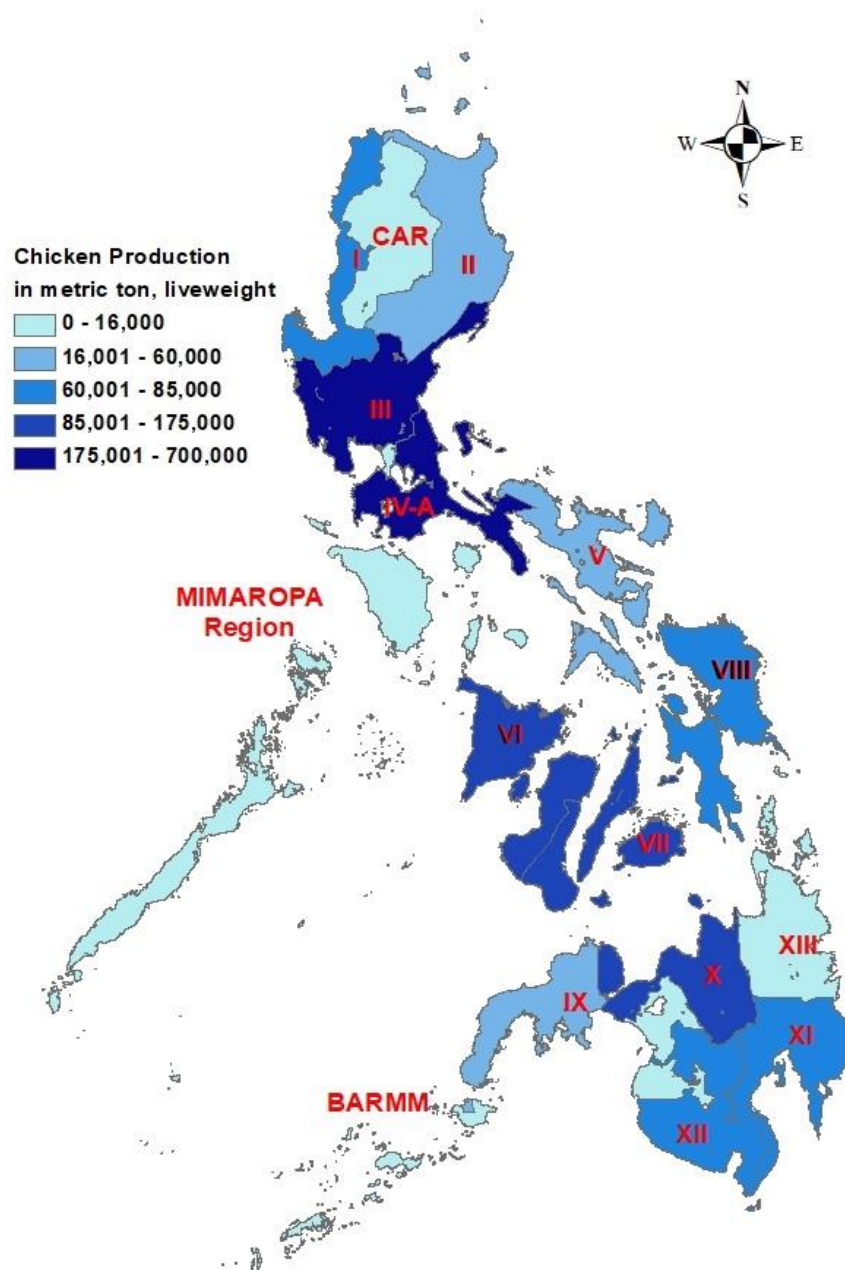

Figure 2. Distribution of Chicken Production by Region  
Philippines: January-December 2019<sup>P</sup>

<sup>P</sup>— Preliminary  
Source: Philippine Statistics Authority

Among regions, Central Luzon was the top producer of chicken with 699.66 thousand metric tons, liveweight. This was followed by CALABARZON with 343.26 thousand metric tons, liveweight, and Northern Mindanao with 170.02 thousand metric tons, liveweight. The combined output of these three regions accounted for 62.9 percent of the country's total chicken production. (Figure 2, and Table 2)

## 2. Prices

### a. Farmgate Price

Figure 4. Monthly Average Farmgate Prices of Broiler Chicken (Commercial), Philippines: January-December, 2017-2019<sup>P</sup>

<sup>P</sup>– Preliminary

Source: Philippine Statistics Authority

The annual average farmgate price of broiler chicken in commercial farms in 2019 was PhP 80.80 per kilogram, liveweight. This was -4.7 percent lower than the previous year's average farmgate price of PhP 84.79 per kilogram, liveweight.

The highest average farmgate price was recorded in October at PhP 98.98 per kilogram, liveweight, while the lowest was quoted in April at PhP 67.70 per kilogram, liveweight. (Figure 4, and Table 4)

### b. Retail Price

Figure 5. Monthly Average Retail Prices of Fully Dressed Broiler Chicken Philippines: January-December, 2017-2019<sup>P</sup>

<sup>P</sup>– Preliminary

Source: Philippine Statistics Authority

The annual average retail price of fully dressed broiler chicken in 2019 was PhP 155.36 per kilogram. This was 2.0 percent higher compared with the average retail price of PhP 152.29 per kilogram in 2018.

The highest average retail price was observed at PhP 166.75 per kilogram during the month of November, while the lowest was in April at PhP 148.20 per kilogram. (Figure 5, and Table 5)

### **3. Value of Production**

The gross value of chicken production at current prices was PhP 173.94 billion in 2019 or 1.9 percent higher than the PhP 170.72 billion gross receipt in 2018.

At constant prices, the gross value of chicken production was PhP 179.21 billion in 2019. This was 5.0 percent higher compared with the PhP 170.72 billion earnings in 2018. (Table 6)

### **4. Imports**

In 2019, the total volume of imported chicken meat was recorded at 290.25 thousand metric tons. This was 16.3 percent higher than the 249.53 thousand metric tons level in 2018. The highest volume of imported chicken in 2019 was noted in October to December at 90.51 thousand metric tons. (Table 7)

**B. Chicken Egg**  
**1. Volume of Production**  
a. National

Figure 6. Volume of Chicken Egg Production  
Philippines: January-December, 2018-2019<sup>P</sup>

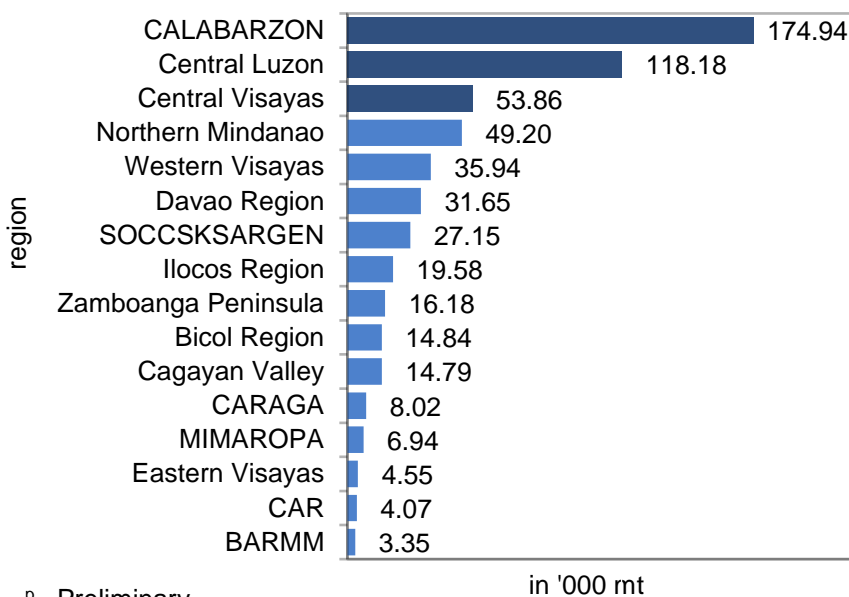

<sup>P</sup>– Preliminary  
Source: Philippine Statistics Authority

The total chicken egg production was estimated at 583.23 thousand metric tons in 2019. It grew by 9.2 percent compared with the 533.91 thousand metric tons output in the previous year. (Figure 6, and Table 8)

b. Regional

Figure 7. Distribution of Chicken Egg Production  
by Region, Philippines: January-December 2019<sup>P</sup>

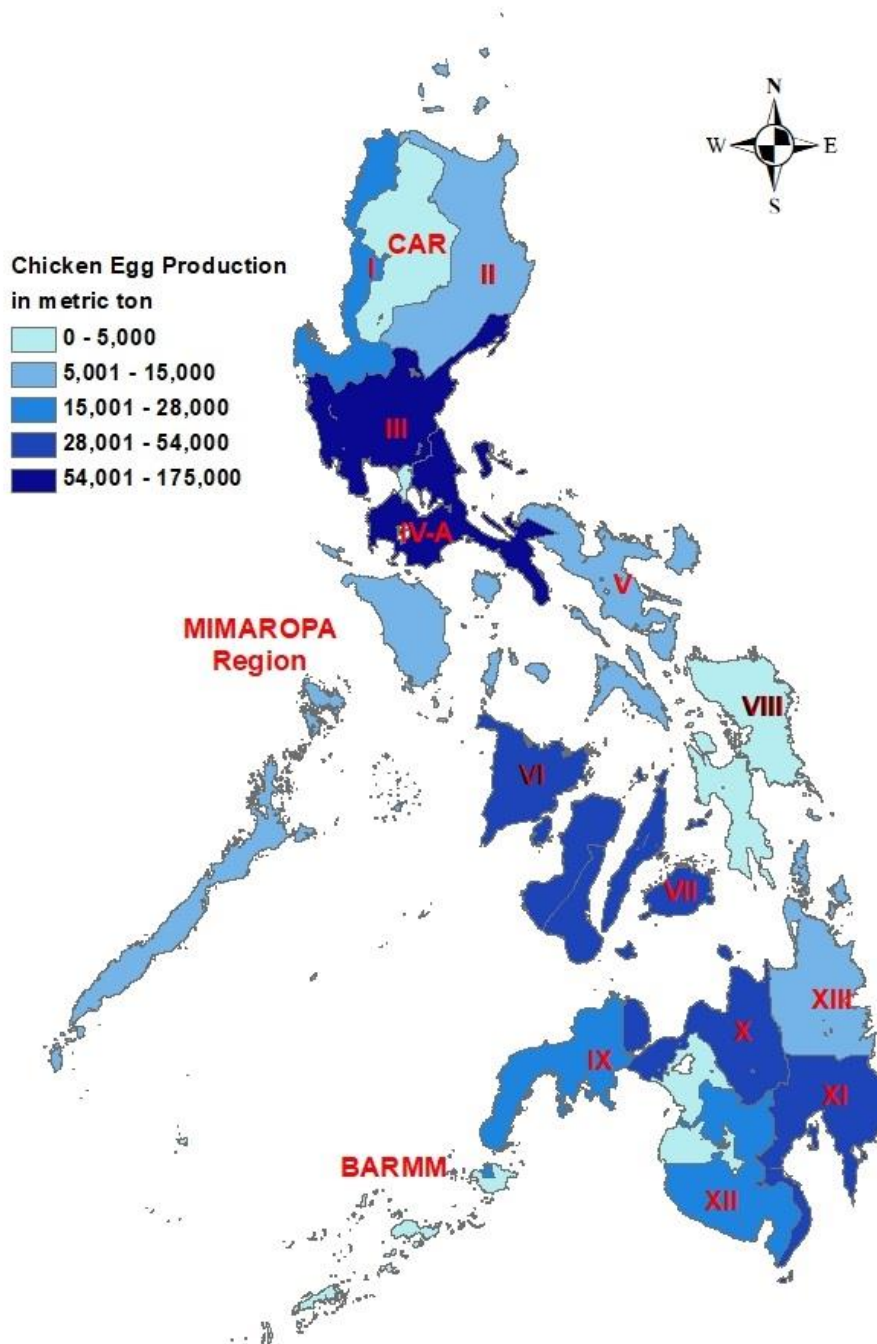

<sup>P</sup>– Preliminary  
Source: Philippine Statistics Authority

CALABARZON was the top producer of chicken egg in 2019 with 174.94 thousand metric tons. This was followed by Central Luzon and Central Visayas with productions of 118.18 thousand metric tons, and 53.86 thousand metric tons, respectively. Collectively, these regions contributed 59.5 percent share to the total chicken egg production of the country. (Figure 7, and Table 9)

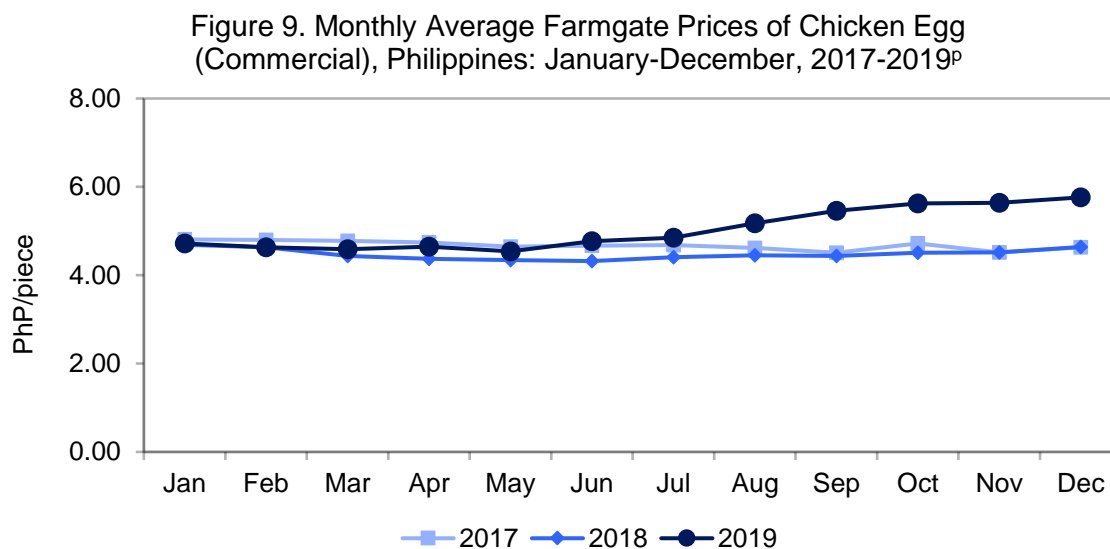

Figure 8. Thematic Map of Volume of Chicken Egg Production Philippines: January-December 2019<sup>P</sup>

<sup>P</sup>— Preliminary  
 Source: Philippine Statistics Authority

## 2. Prices

### a. Farmgate Price

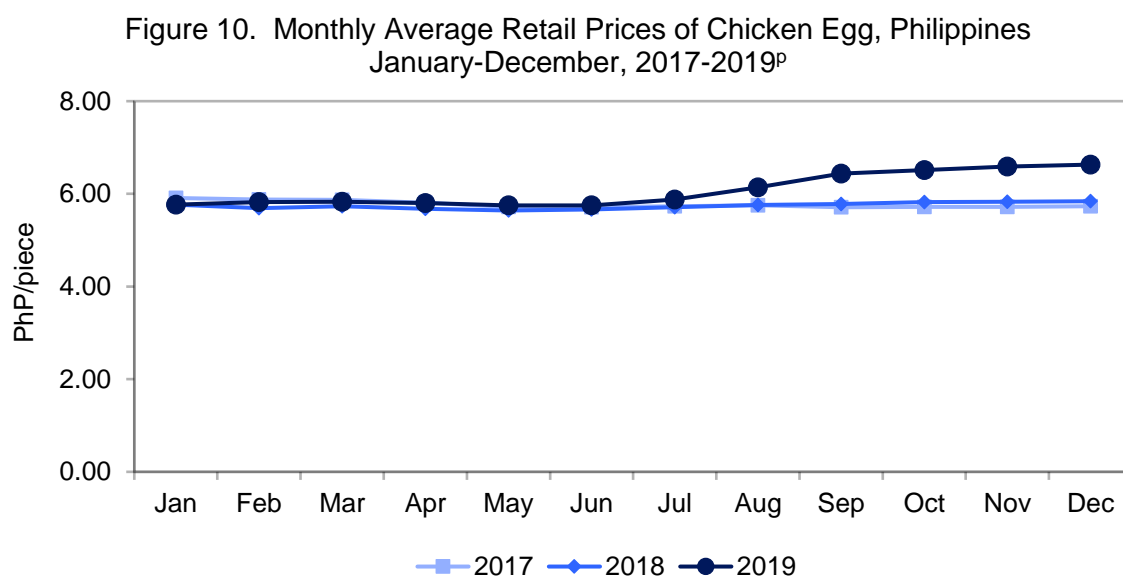

<sup>P</sup>— Preliminary

Source: Philippine Statistics Authority

The annual average farmgate price of chicken egg in commercial farms was PhP 5.04 per piece in 2019. This was 12.5 percent higher than the average price of PhP 4.48 per piece in 2018.

The highest price was noted in December at PhP 5.76 per piece, while the lowest was recorded in May at PhP 4.54 per piece. (Figure 9, and Table 11)

### b. Retail Price

<sup>P</sup>— Preliminary

Source: Philippine Statistics Authority

The annual average retail price of chicken egg was PhP 6.08 per piece in 2019. This was higher by 5.9 percent than the average price of PhP 5.74 per piece in 2018.

The highest average retail price of chicken egg was recorded in December at PhP 6.63 per piece while the lowest was recorded during May and June at PhP 5.75 per piece. (Figure 10, and Table 12)

### **3. Value of Production**

At current prices, the gross receipt from chicken egg production was PhP 63.53 billion in 2019. This was 19.1 percent higher than the earnings in the previous year of PhP 53.36 billion.

At constant prices, the gross value of chicken egg production was PhP 58.29 billion in 2019. This recorded an increase of 9.2 percent from the previous year's record of PhP 53.36 billion. (Table 13)
