Women's Status and Empowerment: Results from 2013 NDHS

The 2013 NDHS included a module on women's safety, health, and empowerment and the extent of violence against women. It is the third demographic and health survey (NDHS) conducted in the Philippines. It is the third comprehensive and in-depth survey of the population and health situation in the country. The 2013 National Demographic and Health Survey (NDHS) provides up-to-date information on the fertility, child mortality, and health status of the population.
