

SPECIAL RELEASE

CHICKEN EGG SITUATION REPORT July to September 2020

Date of Release: 20 November 2020

Reference No. 2020-355

Figure 1. Volume of Chicken Egg Production and Annual Growth Rate, Philippines July-September 2018-2020^P

^P – Preliminary

Source: Philippine Statistics Authority

The total chicken egg production from July to September 2020 was estimated at 154.30 thousand metric tons. This was 6.0 percent higher than the previous year's same quarter output of 145.54 thousand metric tons.

Among the regions, CALABARZON was the top producer of chicken egg during the quarter with a production of 47.44 thousand metric tons. This was followed by Central Luzon with 33.88 thousand metric tons, and Central Visayas with 13.45 thousand metric tons. These three regions accounted for 61.4 percent of the country's total chicken egg production.

Relative to their levels in the same quarter a year ago, 12 regions recorded increments in production during the period, with Eastern Visayas posting the highest annual growth of 42.5 percent. This region recorded a production of 1.54 thousand metric tons this quarter, from 1.08 thousand metric tons in the same period of 2019. (Figure 1 and Table 1)

Figure 2. Annual Growth Rate of Chicken Laying Flock Inventory by Type, Philippines: as of 01 October 2019-2020^P

^P – Preliminary
 Source: Philippine Statistics Authority

As of 01 October 2020, the adult female inventory of native/improved chicken was estimated at 22.16 million birds. This was 0.4 percent higher than the 22.08 million birds recorded in the same period of the previous year. Population of foreign strain layers was registered at 35.20 million birds, an increase of 4.1 percent relative to the 33.82 million birds in the same period of 2019.

Of the total laying flock, 38.6 percent were native/improved chicken and 61.4 percent were layer chicken. (Figure 2 and Table 2)

Figure 3. Average Farmgate Price of Chicken Egg (Commercial) and Annual Growth Rate, Philippines July-September 2018-2020^P

^P – Preliminary
 Source: Philippine Statistics Authority

The average farmgate price of chicken egg in commercial farms during the quarter was quoted at PhP 5.71 per piece. This was 10.5 percent higher than the average farmgate price of PhP 5.16 per piece in the same period of 2019.

During the reference period, the highest farmgate price of chicken egg was noted in July at PhP 5.78 per piece, while the lowest was in September at PhP 5.62 per piece. (Figure 3 and Table 3)

National Statistician and Civil Registrar General

TECHNICAL NOTES

This Chicken Egg Situation Report presents the chicken egg industry in terms of volume of production, inventory by type of laying flock, and average farmgate price. The report is prepared to serve as a ready reference for PSA's various clients and stakeholders in the agriculture sector. It is released quarterly; that is, every January, May, August, and November.

Concepts and Definitions

Volume of production refers to the volume of chicken egg disposed from locally-raised chicken including those table eggs which were shipped out to other regions/provinces.

Inventory refers to the actual number of chicken layers and native chicken present in the farm as of a specific reference date.

Farmgate price refers to the price received by raisers for their produce at the location of farm. Thus, the marketing costs, such as the transport and other marketing cost (if any) incurred in selling the produce, are not included in the farmgate prices.

STATISTICAL TABLES

Table 1. Volume of Chicken Egg Production by Region, Philippines
July-September 2018-2020^P

Region	Production (in metric tons)			Growth Rate (in percent)		Percent Share to 2020 ^P
	2018	2019	2020 ^P	2019	2020 ^P	
Philippines	133,717	145,544	154,295	8.8	6.0	100.0
CAR	1,025	1,045	1,198	2.0	14.6	0.8
I - Ilocos Region	4,662	4,843	5,437	3.9	12.3	3.5
II - Cagayan Valley	3,599	3,652	3,473	1.5	-4.9	2.3
III - Central Luzon	26,523	30,674	33,882	15.7	10.5	22.0
IVA - CALABARZON	40,037	43,213	47,435	7.9	9.8	30.7
