

SPECIAL RELEASE

Updates on January-March 2021 Palay and Corn Estimates, 01 February 2021

Date of Release: 15 March 2021

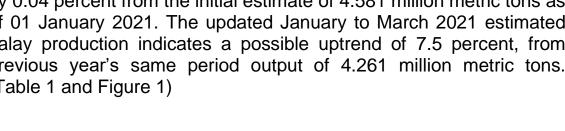

Reference No. 2021- 118

HIGHLIGHTS

The updated January to March 2021 production on palay based on standing crop as of 01 February 2021 may be slightly greater than the January to March 2021 forecasts. On the other hand, the probable corn output may be lower than the January to March 2021 forecasts. Both the updated production on palay and corn based on standing crop as of 01 February 2021 may increase from January to March 2020 final estimates.

PALAY

1. Based on standing crop as of 01 February 2021 (updated), the probable palay production may increase to 4.583 million metric tons or by 0.04 percent from the initial estimate of 4.581 million metric tons as of 01 January 2021. The updated January to March 2021 estimated palay production indicates a possible uptrend of 7.5 percent, from previous year's same period output of 4.261 million metric tons. (Table 1 and Figure 1)

million metric tons 4.583 4.581 4.261 Jan-Mar 2021 Jan 2021 Rd Jan-Mar 2020 (as of 01 Feb 2021) (as of 01 Jan 2021)

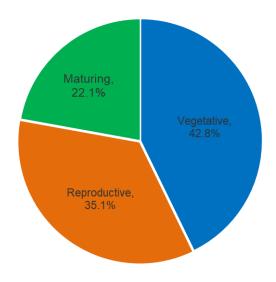

Figure 1. Palay: January-March Crop Production Estimates, 2020-2021

Source: Philippine Statistics Authority, Monthly Palay and Corn Situation Reporting System (MPCSRS)

- 2. Harvest area may increase by 4.6 percent, from 1,098.44 thousand hectares from Jan to Mar 2020. Yield per hectare may increase to 3.99 metric tons, from 3.88 metric tons in the same period of previous year. (Table 1)
- 3. About 259.71 thousand hectares or 22.6 percent of the updated standing crop have been harvested. (Tables 1 and 2)
- 4. As for the farmer's planting intentions for January to March 2021, 593.94 thousand hectares or 63.9 percent of the perceived area have been actually planted. (Table 3)
- 5. Of the total area of standing palay to be harvested for April-June 2021, 42.8 percent were at the vegetative stage, 35.1 percent at the reproductive stage, and 22.1 percent at the maturing stage. (Table 4 and Figure 2)

CORN

1. The probable corn production for January to March 2021, based on standing crop as of 01 February 2021 (updated), may reach to 2.52 million metric tons, lower than the estimated corn production of 2.53 million metric tons as of 01 January 2021. The updated estimate of corn production for January to March 2021 may be higher by 9.6 percent from the previous year's same period level of 2.30 million metric tons. (Table 5 and Figure 3)

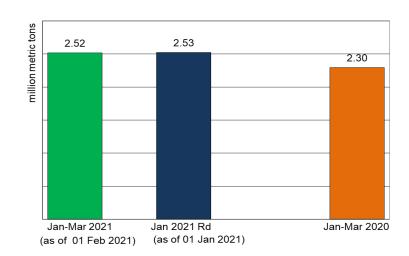

Figure 3. Corn: January-March Crop Production Estimates, 2020-2021

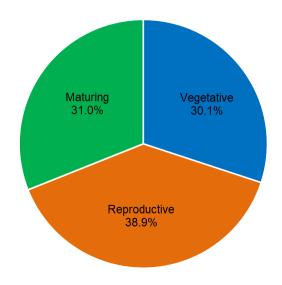

Source: Philippine Statistics Authority, Monthly Palay and Corn Situation Reporting System (MPCSRS)

- 2. Harvest area may increase to 699.97 thousand hectares, from 683.83 thousand hectares from Jan to Mar 2020. Yield per hectare may increase to 3.60 metric tons, from the 3.36 metric tons in the same period of previous year. (Table 5)
- 3. About 244.10 thousand hectares or 34.9 percent of the updated standing crop has been harvested. (Tables 5 and 6)
- Around 188.99 thousand hectares or 47.3 percent of the planting intentions for January to March 2021 crop have been realized. (Table 7)

5. Of the total area of 635.99 thousand hectares of standing crop for the April to June 2021 harvests, 30.1 percent were at vegetative stage, 38.9 percent at reproductive stage, and 31.0 percent at maturing stage. (Table 8 and Figure 4).

National Statistician and Civil Registrar General

Technical Notes

Production refers to the quantity produced and actual harvested/to be harvested palay and corn during the reference period. Harvest area refers to the actual area harvested/to be harvested during the reference quarter.

Updates on production and harvest area estimates of palay and corn are generated from the Monthly Palay and Corn Situation Reporting System (MPCSRS). It is a monitoring activity conducted monthly in-between Palay and Corn Production Survey (PCPS) rounds. Monitoring is conducted in February, March, May, June, August, September, and November. MPCSRS updates the quarterly estimates on production and area for the current quarter based on the PCPS results of the previous survey round.

The data generated from MPCSRS are as follows:

- 1) Updates on current quarter's production and area estimates based on the standing crop with indications on crop situation; and
- 2) Updates on current quarter's estimates on planting intentions based on actual plantings.
