

# 2022 NDHS

## NATIONAL DEMOGRAPHIC AND HEALTH SURVEY

The 2022 Philippine National Demographic and Health Survey (NDHS) is the seventh Demographic and Health Survey (DHS) conducted in the Philippines in collaboration with the worldwide Demographic and Health Surveys Program, and the 12th in a series of national DHS conducted every five years since 1968. The 2022 NDHS was implemented by the Philippine Statistics Authority (PSA). The United States Agency for International Development (USAID) provided technical assistance through ICF under the DHS Program.

### Total Fertility Rate (TFR)

(Women aged 15-49)

# 1.9

Children per woman for the 3-year period preceding the survey.

If fertility were to remain constant at current levels, a woman would bear an average of **2 children** in her lifetime. Hence, the Philippines is already **below the replacement fertility level**.

### TEENAGE PREGNANCY

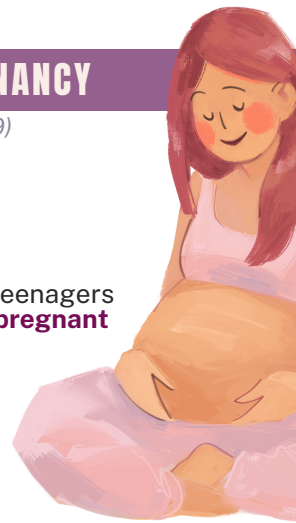

(Women aged 15-19)

# 5.4%

of teenagers have ever been pregnant

# 1.6%

were pregnant at the time of the survey.

RURAL

# 2.2

(children per woman)

URBAN

# 1.7

(children per woman)

Fertility is higher in rural areas than in urban areas.

### FERTILITY PREFERENCES

(Currently married women aged 15-49)

**1 in 2** women no longer desires more children

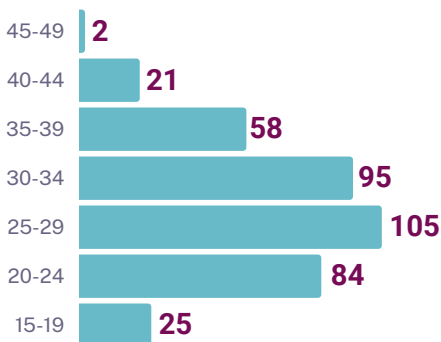

**17.4%** wants to delay next birth for 2 or more years

**0.2%** want a child but not sure when

**13.9%** wants next birth within 2 years

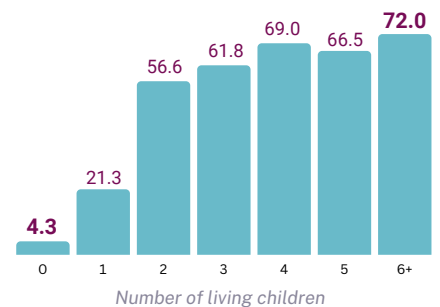

### BIRTHS PER THOUSAND BY AGE GROUP

(Women aged 15-49)

Fertility is low among teenagers (**25 births per 1,000 women aged 15-19**).

It peaks at **105 births per 1,000 among women age 25-29**.

The percentage of women who want no more children increases with number of living children.
