Notes: The methodology for the computation of annual estimates of labor and employment indicators is based on a Resolution found in the PSA website, *Approving and Adopting the Official Methodology for Generating Annual Labor And Employment Estimates*, using the average estimates of the four LFS rounds.

0.0 - Less than 0.05 percent.

The annual estimates were based on the final results of the January and April 2016 rounds of LFS and preliminary results of the July and October 2016 rounds of LFS.

The estimates for the January 2016 was derived using 2000 Census-based Population Projection. Starting with the April 2016 LFS round, the population projection based on the 2010 Census of Population and Housing (2010 CPH) was adopted to generate labor force statistics.
