*Notes:* The methodology for the computation of annual estimates of labor and employment indicators is based on NSCB Resolution No. 9, Approving and Adopting the Official Methodology for Generating Annual Labor And Employment Estimates, using the average estimates of the four LFS rounds.

The computation of the annual estimates for 2013 used the average estimates of the three quarters (January, April and July). It excluded the LFS data for the last quarter round (October) because accomplished questionnaires from Leyte were damaged by typhoon Yolanda.
