

THE WATER ACCOUNTS OF THE PHILIPPINES

provide information on the flows of water between the environment and the economy - from its initial abstraction as input to various economic activities to its return to the environment.

Total Water Abstraction 2010-2022, in billion cubic meters (bcm)

Source of Basic Data: National Water Resources Board

WHAT IS ABSTRACTION?

It is the amount of water that is removed from any source, either permanently or temporarily, in a given period of time. It is expressed in volume terms (cubic meters).

SOURCES OF ABSTRACTED WATER Average, 2010 to 2022

USES OF ABSTRACTED WATER Average, 2010 to 2022

SDG INDICATORS 6.4.1 AND 6.4.2

WATER USE EFFICIENCY

increased from PhP 200.09 of GVA per cubic meter of water used in 2021 to PhP 211.04/m³ in 2022.

LEVEL OF WATER STRESS¹

remains to be **LOW** from 27.2% in 2021 to 27.8% in 2022.

¹Based on parameters and criteria of FAO AQUASTAT
Low level of water stress ranges from 25 to 50 percent

WATER ABSTRACTED FOR OWN USE

increased to 222.31 bcm 2022 from 217.83 bcm in 2021.

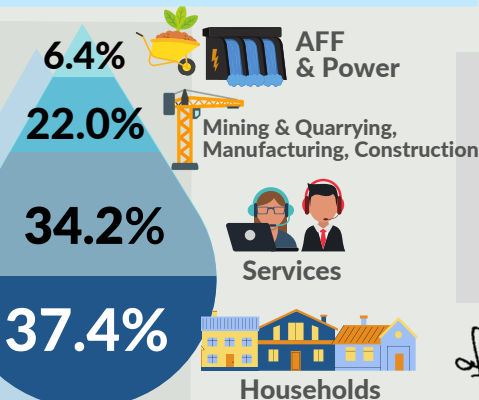

AVERAGE SHARE

by sector, 2010 to 2022

WATER FOR DISTRIBUTION

increased to 3.72 bcm in 2022 from 3.51 bcm 2021.

AVERAGE SHARE²

by sector, 2010 to 2022
