Note:

Of the 224 establishments, six geothermal power plants were classified under steam, air conditioning supply and production of ice in the previous surveys and preliminary results of 2013 ASPBI. These geothermal power plants generates geothermal energy in the form of steam recovered from the site.

Electric power generation, transmission and distribution includes the operation of generation facilities that produce electric energy, including thermal, nuclear, and renewable. Hence, in the final results of 2013 ASPBI, these six geothermal power plants were re-classified to electric power generation, transmission and distribution.
