The PhilSys registration is a 3-step process: 1) collection of demographic information, 2) recording of biometrics and validation, and 3) issuance of PhilSys number (PSN) and PhilID. Step 1 registration is done house-to-house as precaution against COVID-19.

Figure 1: Actual and target step 1 registration

Note: No targets set for Sundays

5,517,986 Households registered	86.7% with ID ⁵	53.2% are female

Figure 2: Types of available IDs among registrants (cumulative)⁵

84.7% Deployed enumerators	49 Average registration per enumerator
4.2 min Average registration time per registrant	8.5 min Average total transaction time per registration

Notes:

- 1) Based on the Step 1 registration target of 9,000,000.
- 2) Percent of today's target is computed based on the daily maximum registration of all registration kits. Registration counts are expected to increase upon the completion of data uploads from the field offices.
- 3) Cumulative Step 1 registration targets are based on projections computed using the average Step 1 registration time. Minimal Step 1 registration continued for off-track provinces after Dec 30 to meet their respective 2020 Step 1 registration targets; estimated accomplishment is around 80,000 registrations. These are included in the total cumulative registrations as of Jan 8.
- 4) Percent of those who answered this optional rider question, which is not included in the PhilSys registry.
- 5) Recording of these indicators started on Oct 25. Percent is computed from registration data as of Oct 25.
