is available in PDF format.

FOREWORD

The Philippine Statistics Authority (PSA) releases the First Quarter 2024 Value of Production in Philippine Agriculture and Fisheries.

The report covers all agricultural commodities, highlighting 22 commodities for crops, nine commodities for livestock and poultry, and 21 commodities for fisheries. It presents the value of agricultural production at constant 2018 prices and at current prices.

PSA welcomes comments and suggestions from its data users, clients, and stakeholders for the improvement of this report.

TECHNICAL NOTES ON THE PREPARATION OF VALUE OF PRODUCTION IN THE PHILIPPINE AGRICULTURE AND FISHERIES REPORT

The Value of Production in the Philippine Agriculture and Fisheries (formerly known as Performance of Philippine Agriculture) report presents the accomplishments of agriculture and fisheries during a particular reference period. The value of production is at constant 2018 prices and at current prices. The valuation is also done by commodity group (crops, livestock and poultry, and fisheries). These serve as inputs in the estimation of Gross Value Added (GVA) in Agriculture and Fishing.

The value of production in agriculture and fisheries covers all agricultural commodities, highlighting 22 commodities for crops, nine commodities for livestock and poultry, and 21 commodities for fisheries.

A. Sources of Basic Data

The generation of the value of production requires data on volume of production and farmgate prices. These data are sourced from the following PSA surveys and administrative-based records from other government agencies:

Variable	Source
1. Volume of Production by commodity	
a. Crops	Palay Production Survey (PPS)
	Corn Production Survey (CPS)
	Crops Production Survey (CrPS)
b. Livestock and Poultry by commodity	Backyard Livestock and Poultry Survey (BLPS)
	Commercial Livestock and Poultry Survey (CLPS)
c. Fisheries	Quarterly Municipal Fisheries Survey (QMFS)
	Quarterly Inland Fisheries Survey (QIFS)
	Quarterly Commercial Fisheries Survey (QCFS)
	Quarterly Aquaculture Survey (QAqS)
2. Farmgate Prices	
a. Crops	Farm Prices Survey (FPS)
	CPS
	CrPS
b. Livestock and Poultry	BLPS
	CLPS
c. Fisheries	QMFS
	QIFS
	QCFS
	QAqS
3. Administrative Data	
a. Volume of Production of Centrifugal Sugar and Raw Sugar	Sugar Regulatory Administration (SRA)
b. Dairy Production and Price for Goat and Cattle	National Dairy Authority (NDA)
c. Dairy Production and Price for Carabao	Philippine Carabao Center (PCC)
d. Volume and Value of Commercial Fish Unloadings	Philippine Fisheries Development Authority (PFDA), Local Government Units (LGUs), and Privately Managed Landing Centers
e. Volume and Value of Municipal Fish Unloadings	PFDA and LGUs

B. Estimation Procedure

The valuation of agriculture and fisheries production is prepared quarterly. It is done as follows:

At Constant 2018 Prices

Valuation at constant prices is done by multiplying the volume of production of each commodity by the 2018 average farmgate price.

Formula:

$$VP_o = Q_t \times FGP_o$$

Where:

VP_o = Value of production at constant prices;

Q_t = Volume of production for the current period; and

FGP_o = Farmgate price at constant 2018 prices.

At Current Prices

Valuation at current prices is done by multiplying the volume of production of each commodity by the average farmgate price during the reference period.

Formula:

$$VP_t = Q_t \times FGP_t$$

Where:

VP_t = Value of production at current prices;

Q_t = Volume of production for the current period; and

FGP_t = Farmgate price at current prices.

The average prices of corn, coconut, banana, mango, tobacco, coffee, and onion are weighted using varietal classification, while cassava price is weighted by its use (i.e., food and industrial).

The farmgate price of sugarcane was derived by multiplying the volume of raw sugar by the price of centrifugal sugar. The resulting value is multiplied by 0.65 to indicate that 65 percent of the total value of raw sugar produced is the value of the product of agriculture. This is based on the prevailing 65-35 planter-miller sharing system. The total value credited to agriculture was divided to the total volume of sugarcane to derive the average price of sugarcane.

In the case of “other crops”, a set of indicator commodities was established. These indicator commodities are used to get the weighted price for “other crops”. It is derived by dividing total value of production by the total volume of production of the indicator commodities. This weighted price is used in computing the value of “other crops” production.

The prices of livestock and poultry are weighted using the type of farm (i.e., commercial and backyard).

For fisheries commodities, the prices are derived from the value of production at current prices divided by the volume of production of the reference year.

C. Definitions

Value of Production at Constant Prices refers to valuation of transactions, wherein the influence of price changes from the base year to the current year has been removed.

Value of Production at Current Prices is the value based on prices during the reference period.

**VALUE OF PRODUCTION
IN PHILIPPINE
AGRICULTURE AND
FISHERIES**

FIRST QUARTER 2024

HIGHLIGHTS

Figure 1. Value of Production in Agriculture and Fisheries at Constant 2018 Prices
Annual Growth Rates (%)
Q1 2023 and Q1 2024

Source: Philippine Statistics Authority

The value production in agriculture and fisheries at constant 2018 prices amounted to PhP 428.99 billion in the first quarter of 2024 and exhibited a year-on-year growth of 0.05 percent. This was attributed to the expansion in the value of poultry production. On the other hand, crops, livestock, and fisheries production registered contractions by 0.3 percent, 3.6 percent, and 1.3 percent, respectively. (Figure 1, and Tables 1a, and 2a)

Crops, which accounted for 57.6 percent or PhP 247.04 billion of the total value of production in agriculture and fisheries at constant 2018 prices, declined by 0.3 percent year-on-year in the first quarter of 2024. The value of palay production posted a 2.0 percent contraction. Meanwhile, the value of corn production was up by 0.5 percent during the quarter.

Decreases in the value of production at constant 2018 prices were registered by the following crop commodities:

- a. sweet potato, 9.0 percent;
- b. cassava, 8.9 percent;
- c. mongo, 6.4 percent;
- d. banana, 4.5 percent;
- e. ampalaya, 4.0 percent;

- f. eggplant, 3.6 percent;
- g. coconut, 3.3 percent;
- h. abaca, 1.5 percent;
- i. potato, 0.7 percent; and
- j. other crops, 5.5 percent.

Meanwhile, increases in the value of production at constant 2018 prices were recorded by the following crop commodities:

- a. onion, 28.6 percent;
- b. coffee, 25.2 percent;
- c. sugarcane, 17.2 percent;
- d. tobacco, 9.5 percent;
- e. cabbage, 8.2 percent;
- f. calamansi, 6.3 percent;
- g. cacao, 2.7 percent;
- h. mango, 2.6 percent;
- i. pineapple, 1.2 percent;
- j. rubber, 1.0 percent; and
- k. tomato, 0.5 percent.

(Tables 1b, 2a, 2b, and 3a)

At constant 2018 prices, the value of **livestock** production was recorded at PhP 59.46 billion, or a decline of 3.6 percent in the first quarter of 2024. It accounted for 13.9 percent of the total value of production in agriculture and fisheries.

Declines were registered in the value of hog production at 4.3 percent and goat at 4.1 percent. On the other hand, the value of dairy, carabao, and cattle production went up by 3.7 percent, 1.0 percent, and 0.3 percent, respectively. (Tables 1c, 2c, and 3c)

The value of **poultry** production at constant 2018 prices grew by 5.9 percent in the first three months of 2024. It amounted to PhP 68.76 billion and shared 16.0 percent to the total value of production in agriculture and fisheries at constant 2018 prices. Increases were noted for chicken at 7.7 percent, chicken eggs at 2.4 percent, and duck at 1.6 percent. Meanwhile, duck eggs recorded an annual contraction of 4.3 percent in the value of production. (Tables 1c, 2c, and 3c)

The value of **fisheries** production at constant 2018 prices, which amounted to PhP 53.73 billion, contracted by 1.3 percent year-on-year.

The following fish commodities recorded contractions in the value of production:

- a. threadfin bream (bisugo), 37.2 percent;
- b. mudcrab (alimango), 33.2 percent;
- c. *Bali sardinella* (tamban), 29.9 percent;
- d. blue crab (alimasag), 29.5 percent;
- e. grouper (lapu-lapu), 27.1 percent;
- f. slipmouth (sapsap), 25.8 percent;
- g. milkfish (bangus), 7.6 percent;
- h. big-eyed scad (matangbaka), 5.3 percent;
- i. squid (pusit), 4.5 percent;
- j. seaweeds, 0.4 percent; and
- k. other fisheries, 6.6 percent.

On the other hand, annual increases in the value of production were noted in the following species:

- a. bigeye tuna (tambakol/bariles), 47.7 percent;
- b. fimbriated sardines (tunsoy), 45.1 percent;
- c. frigate tuna (tulingan), 29.6 percent;
- d. skipjack (gulyasan), 28.3 percent;
- e. yellowfin tuna (tambakol/bariles), 13.3 percent;
- f. tilapia, 8.8 percent;
- g. roundscad (galunggong), 6.0 percent;
- h. cavalla (talakitok), 2.7 percent;
- i. Indian mackerel (alumahan), 1.1 percent;
- j. *P. Vannamei*, 1.0 percent; and
- k. tiger prawn (sugpo), 0.6 percent.

(Tables 1d, 2d, and 3d)
