FOREWORD

The Philippine Statistics Authority (PSA) releases the Fourth Quarter 2024 Value of Production in Philippine Agriculture and Fisheries.

The Value of Production in Philippine Agriculture and Fisheries report presents the accomplishments of agriculture and fisheries during a particular reference period. The report covers all agricultural commodities, highlighting 22 commodities for crops, nine commodities for livestock and poultry, and 21 commodities for fisheries. It presents the value of agricultural production at constant 2018 prices and at current prices.

The statistical tables include data on value of production in agriculture and fisheries at constant 2018 prices and at current prices, percent distribution of value of production, volume of production, and farmgate prices by commodity covering the period of first quarter of 2022 to fourth quarter of 2024.

The PSA welcomes comments and suggestions from its data users, clients, and stakeholders for the improvement of this report.

TECHNICAL NOTES

The Value of Production in Philippine Agriculture and Fisheries (formerly known as Performance of Philippine Agriculture) report presents the accomplishments of agriculture and fisheries during a particular reference period. The value of production is presented at constant 2018 prices and at current prices. The valuation is also done by commodity group (crops, livestock and poultry, and fisheries). The value of production for agriculture and fisheries serves as input in the estimation of Gross Value Added (GVA) for Agriculture and Fishing.

The value of production in agriculture and fisheries covers all agricultural commodities, highlighting 22 commodities for crops, nine commodities for livestock and poultry, and 21 commodities for fisheries.

A. Sources of Basic Data

The generation of the value of production requires data on volume of production and farmgate prices. These data are sourced from the following PSA surveys and administrative-based records from other government agencies:

Variable	Source
1. Volume of Production by commodity	
a. Crops	Palay Production Survey (PPS)
	Corn Production Survey (CPS)
	Crops Production Survey (CrPS)
b. Livestock and Poultry by commodity	Backyard Livestock and Poultry Survey (BLPS) Commercial Livestock and Poultry Survey (CLPS)
2. Volume and Value of Production at Current Prices by commodity	
a. Fisheries	Quarterly Municipal Fisheries Survey (QMFS)
	Quarterly Inland Fisheries Survey (QIFS)
	Quarterly Commercial Fisheries Survey (QCFS)
	Quarterly Aquaculture Survey (QAqS)
3. Farmgate Prices	
a. Crops	Farm Prices Survey (FPS)
	CPS
	CrPS
b. Livestock and Poultry	BLPS
	CLPS
c. Fisheries	QMFS
	QIFS
	QCFS
	QAqS

Variable	Source
4. Administrative Data	
a. Volume of Production of Centrifugal Sugar and Raw Sugar	Sugar Regulatory Administration (SRA)
b. Dairy Production and Price for Goat and Cattle	National Dairy Authority (NDA)
c. Dairy Production and Price for Carabao	Philippine Carabao Center (PCC)
d. Volume and Value of Commercial Fish Unloadings	Philippine Fisheries Development Authority (PFDA), Local Government Units (LGUs), and Privately Managed Landing Centers
e. Volume and Value of Municipal Fish Unloadings	PFDA and LGUs

B. Estimation Procedure

The valuation of agriculture and fisheries production is prepared quarterly. It is done as follows:

At Constant 2018 Prices

Valuation at constant prices is done by multiplying the volume of production of each commodity by the 2018 average farmgate price.

Formula:

$$VP_o = Q_t \times FGP_o$$

Where:

VP_o = Value of production at constant prices;

Q_t = Volume of production for the current period; and

FGP_o = Farmgate price at constant 2018 prices.

At Current Prices

Valuation at current prices is done by multiplying the volume of production of each commodity by the average farmgate price during the reference period.

Formula:

$$VP_t = Q_t \times FGP_t$$

Where:

VP_t = Value of production at current prices;

Q_t = Volume of production for the current period; and

FGP_t = Farmgate price at current prices.

The average prices of corn, coconut, banana, mango, tobacco, coffee, and onion are weighted using varietal classification, while cassava price is weighted by its use (i.e., food and industrial).

The farmgate price of sugarcane was derived by multiplying the volume of raw sugar by the price of centrifugal sugar. The resulting value is multiplied by 0.65 to indicate that 65 percent of the total value of raw sugar produced is the value of the product of agriculture. This is based on the prevailing 65-35 planter-miller sharing system. The total value credited to agriculture was divided to the total volume of sugarcane to derive the average price of sugarcane.

In the case of “other crops”, a set of indicator commodities was established. These indicator commodities are used to get the weighted price for “other crops”. It is derived by dividing total value of production by the total volume of production of the indicator commodities. This weighted price is used in computing the value of “other crops” production.

The prices of livestock and poultry are weighted using the type of farm (i.e., commercial and backyard).

For fisheries commodities, the prices are derived from the value of production at current prices divided by the volume of production of the reference year.

C. Definitions

Value of Production at Constant Prices refers to valuation of transactions, wherein the influence of price changes from the base year to the current year has been removed.

Value of Production at Current Prices is the value based on prices during the reference period.

FOURTH QUARTER 2024**HIGHLIGHTS**

Figure 1. Fourth Quarter Annual Growth Rates of Value of Production in Agriculture and Fisheries at Constant 2018 Prices

Source: Philippine Statistics Authority

In the fourth quarter of 2024, the value of production in **agriculture and fisheries** at constant 2018 prices was estimated at PhP 483.58 billion. This was 2.2 percent lower than its level in the same quarter of the previous year. This was attributed to the reductions in the values of crops, livestock, and fisheries production. Meanwhile, the value of poultry production continued to expand during the quarter. For January to December 2024, the value of agriculture and fisheries production at constant 2018 prices went down by 2.2 percent. (Figure 1, and Tables 1.1 and 2.1)

The value of **crop** production amounted to PhP 281.55 billion at constant 2018 prices, decreased by 3.1 percent in the fourth quarter of 2024. It accounted for 58.2 percent of the total value of agriculture and fisheries production. Palay and corn recorded year-on-year decrements in the value of production at 0.1 percent and 0.6 percent, respectively.

All the highlighted crop commodities posted decreases in the value of production at constant 2018 prices except tobacco, which registered a 25.6 percent increment compared with the previous year's same quarter level.

The declines in the value of production were as follows:

- mongo, 48.2 percent;
- sugarcane, 23.5 percent;
- onion, 11.1 percent;

- d. cassava, 8.5 percent;
- e. sweet potato, 7.1 percent;
- f. banana, 5.8 percent;
- g. eggplant, 5.6 percent;
- h. cacao, 5.1 percent;
- i. mango, 3.9 percent;
- j. coconut, 3.5 percent;
- k. tomato, 2.7 percent;
- l. coffee, 2.6 percent;
- m. rubber, 1.54 percent;
- n. potato, 1.53 percent;
- o. ampalaya, 1.4 percent;
- p. pineapple, 1.1 percent;
- q. cabbage, 1.0 percent;
- r. calamansi, 0.7 percent;
- s. abaca, 0.2 percent; and
- t. other crops, 6.6 percent.

In 2024, the value of crop production at constant 2018 prices declined by 4.2 percent compared to its annual level in 2023. (Tables 1.2, 2.1, 2.2, and 3.2)

The value of **livestock** production at constant 2018 prices, which amounted to PhP 67.67 billion, dropped by 6.2 percent in the fourth quarter 2024. It contributed 14.0 percent to the total value of production in agriculture and fisheries. Decreases in the value of production were recorded for hog at 7.3 percent, goat at 4.1 percent, and cattle at 2.7 percent. Meanwhile, the value of dairy and carabao production registered a year-on-year growth of 4.8 percent and 1.8 percent, respectively. For the whole year of 2024, the value of livestock production at constant 2018 prices declined by 4.3 percent. (Tables 1.3, 2.1, 2.3, and 3.3)

Poultry production which was valued at PhP 71.81 billion at constant 2018 prices recorded a 6.1 percent increase in the fourth quarter of 2024. It contributed 14.8 percent to the total value of agriculture and fisheries production. By poultry commodity, increments in the value of production were noted for chicken eggs at 9.8 percent, chicken at 5.0 percent, and duck at 0.3 percent. On the other hand, duck eggs registered a 3.1 percent drop during the period. Cumulatively, the January to December 2024 value of poultry production at constant 2018 prices recorded an annual growth of 6.6 percent. (Tables 1.3, 2.1, 2.3, and 3.3)

At constant 2018 prices, the value of **fisheries** production, which amounted to PhP 62.55 billion, posted a 2.1 percent reduction in the fourth quarter of 2024. It shared 12.9 percent to the total value of agriculture and fisheries production.

The fish species which recorded decreases in the value of production at constant 2018 prices were as follows:

- a. mudcrab (alimango), 28.9 percent;
- b. cavalla (talakitok), 24.9 percent;
- c. big-eyed scad (matangbaka), 20.6 percent;
- d. Indian mackerel (alumahan), 20.0 percent;
- e. skipjack (gulyasan), 19.1 percent;
- f. slipmouth (sapsap), 17.7 percent;
- g. frigate tuna (tulingan), 17.0 percent;
- h. yellowfin tuna (tambakol/bariles), 15.0 percent;
- i. roundscad (galunggong), 14.3 percent;
- j. seaweed, 12.7 percent;
- k. squid (pusit), 12.4 percent;
- l. grouper (lapu-lapu), 9.3 percent;
- m. fimbriated sardines (tunsoy), 5.5 percent;
- n. *Bali sardinella* (tamban), 4.3 percent;
- o. tiger prawn (sugpo), 2.9 percent; and
- p. tilapia, 2.1 percent.

Meanwhile, expansions in the value of fisheries production at constant 2018 prices were recorded in the following species:

- a. *P. Vannamei*, 59.4 percent;
- b. milkfish (bangus), 10.9 percent;
- c. blue crab (alimasag), 7.2 percent;
- d. threadfin bream (bisugo), 4.0 percent;
- e. bigeye tuna (tambakol/bariles), 0.1 percent; and
- f. other fisheries, 3.8 percent.

The value of fisheries production at constant 2018 prices decreased by 1.1 percent in January to December 2024. (Tables 1.4, 2.1, 2.4, and 3.4)
