FOREWORD

The Philippine Statistics Authority (PSA) releases the Third Quarter 2024 Value of Production in Philippine Agriculture and Fisheries.

The Value of Production in the Philippine Agriculture and Fisheries report presents the accomplishments of agriculture and fisheries during a particular reference period. The report covers all agricultural commodities, highlighting 22 commodities for crops, nine commodities for livestock and poultry, and 21 commodities for fisheries. It presents the value of agricultural production at constant 2018 prices and at current prices.

The statistical tables include data on value of production in agriculture and fisheries at constant 2018 prices and at current prices, percent distribution of value of production, volume of production, and farmgate prices by commodity covering the period of first quarter of 2022 to third quarter of 2024.

The PSA welcomes comments and suggestions from its data users, clients, and stakeholders for the improvement of this report.

TECHNICAL NOTES

The Value of Production in the Philippine Agriculture and Fisheries (formerly known as Performance of Philippine Agriculture) report presents the accomplishments of agriculture and fisheries during a particular reference period. The value of production is presented at constant 2018 prices and at current prices. The valuation is also done by commodity group (crops, livestock and poultry, and fisheries). The value of production for agriculture and fisheries serves as input in the estimation of Gross Value Added (GVA) for Agriculture and Fishing.

The value of production in agriculture and fisheries covers all agricultural commodities, highlighting 22 commodities for crops, nine commodities for livestock and poultry, and 21 commodities for fisheries.

A. Sources of Basic Data

The generation of the value of production requires data on volume of production and farmgate prices. These data are sourced from the following PSA surveys and administrative-based records from other government agencies:

Variable	Source
1. Volume of Production by commodity	
a. Crops	Palay Production Survey (PPS)
	Corn Production Survey (CPS)
	Crops Production Survey (CrPS)
b. Livestock and Poultry by commodity	Backyard Livestock and Poultry Survey (BLPS) Commercial Livestock and Poultry Survey (CLPS)
2. Volume and Value of Production at Current Prices by commodity	
a. Fisheries	Quarterly Municipal Fisheries Survey (QMFS)
	Quarterly Inland Fisheries Survey (QIFS)
	Quarterly Commercial Fisheries Survey (QCFS)
	Quarterly Aquaculture Survey (QAqS)
3. Farmgate Prices	
a. Crops	Farm Prices Survey (FPS)
	CPS
	CrPS
b. Livestock and Poultry	BLPS
	CLPS
c. Fisheries	QMFS
	QIFS
	QCFS
	QAqS

Variable	Source
4. Administrative Data	
a. Volume of Production of Centrifugal Sugar and Raw Sugar	Sugar Regulatory Administration (SRA)
b. Dairy Production and Price for Goat and Cattle	National Dairy Authority (NDA)
c. Dairy Production and Price for Carabao	Philippine Carabao Center (PCC)
d. Volume and Value of Commercial Fish Unloadings	Philippine Fisheries Development Authority (PFDA), Local Government Units (LGUs), and Privately Managed Landing Centers
e. Volume and Value of Municipal Fish Unloadings	PFDA and LGUs

B. Estimation Procedure

The valuation of agriculture and fisheries production is prepared quarterly. It is done as follows:

At Constant 2018 Prices

Valuation at constant prices is done by multiplying the volume of production of each commodity by the 2018 average farmgate price.

Formula:

$$VP_o = Q_t \times FGP_o$$

Where:

VP_o = Value of production at constant prices;

Q_t = Volume of production for the current period; and

FGP_o = Farmgate price at constant 2018 prices.

At Current Prices

Valuation at current prices is done by multiplying the volume of production of each commodity by the average farmgate price during the reference period.

Formula:

$$VP_t = Q_t \times FGP_t$$

Where:

VP_t = Value of production at current prices;

Q_t = Volume of production for the current period; and

FGP_t = Farmgate price at current prices.

The average prices of corn, coconut, banana, mango, tobacco, coffee, and onion are weighted using varietal classification, while cassava price is weighted by its use (i.e., food and industrial).

The farmgate price of sugarcane was derived by multiplying the volume of raw sugar by the price of centrifugal sugar. The resulting value is multiplied by 0.65 to indicate that 65 percent of the total value of raw sugar produced is the value of the product of agriculture. This is based on the prevailing 65-35 planter-miller sharing system. The total value credited to agriculture was divided to the total volume of sugarcane to derive the average price of sugarcane.

In the case of “other crops”, a set of indicator commodities was established. These indicator commodities are used to get the weighted price for “other crops”. It is derived by dividing total value of production by the total volume of production of the indicator commodities. This weighted price is used in computing the value of “other crops” production.

The prices of livestock and poultry are weighted using the type of farm (i.e., commercial and backyard).

For fisheries commodities, the prices are derived from the value of production at current prices divided by the volume of production of the reference year.

C. Definitions

Value of Production at Constant Prices refers to valuation of transactions, wherein the influence of price changes from the base year to the current year has been removed.

Value of Production at Current Prices is the value based on prices during the reference period.

THIRD QUARTER 2024

HIGHLIGHTS

Figure 1. Third Quarter Annual Growth Rates of Value of Production in Agriculture and Fisheries at Constant 2018 Prices

Source: Philippine Statistics Authority

The value of production in **agriculture and fisheries** at constant 2018 prices was estimated at PhP 397.43 billion in the third quarter of 2024. It registered a 3.7 percent year-on-year decline compared with the same quarter of the previous year. The contraction was due to the reductions in the value of crops, livestock, and fisheries production. Meanwhile, the value of poultry production exhibited expansion during the period. (Figure 1, and Tables 1.1, and 2.1)

At constant 2018 prices, **crop** production was valued at PhP 211.62 billion, decreased by 5.1 percent in the third quarter of 2024. It accounted for 53.2 percent of the total value of production in agriculture and fisheries. Palay, which was the biggest contributor to the decline, posted an annual decrease in the value of production at 12.3 percent. On the other hand, the value of corn production grew by 1.3 percent.

The following crop commodities recorded contractions in the value of production at constant 2018 prices:

- a. sugarcane, 83.8 percent;
- b. mango, 11.2 percent;
- c. ampalaya, 5.6 percent;
- d. rubber, 4.6 percent;
- e. cassava, 3.9 percent;
- f. banana, 1.1 percent;
- g. pineapple, 0.4 percent; and
- h. coconut, 0.1 percent.

Meanwhile, increases in the value of production were noted in the following crop commodities:

- a. onion, 98.6 percent;
- b. cabbage, 45.1 percent;
- c. potato, 36.5 percent;
- d. calamansi, 12.1 percent;
- e. tomato, 7.5 percent;
- f. sweet potato, 6.8 percent;
- g. tobacco, 5.1 percent;
- h. mongo, 3.4 percent;
- i. eggplant, 3.3 percent;
- j. cacao, 1.7 percent;
- k. coffee, 0.8 percent;
- l. abaca, 0.4 percent; and
- m. other crops, 8.3 percent.

(Tables 1.2, 2.1, 2.2, and 3.1)

The value of **livestock** production at constant 2018 prices decreased annually by 6.7 percent in the third quarter of 2024. It amounted to PhP 61.67 billion and shared 15.5 percent to the total value of production in agriculture and fisheries. Hog, goat, and carabao registered decreases in the value of production at 8.0 percent, 4.1 percent, and 0.5 percent, respectively. Meanwhile, annual growths were recorded for dairy at 6.0 percent and cattle at 0.9 percent. (Tables 1c, 2c, and 3c)

On the other hand, **Poultry**, the only commodity group which posted growth during the period grew by 5.8 percent. It shared 17.3 percent, which amounted to PhP 68.66 billion, to the total value of production in agriculture and fisheries at constant 2018 prices. Improvements were exhibited in the value of production of chicken eggs at 6.6 percent and chicken at 6.0 percent. On the other hand, duck eggs and duck recorded an annual reduction at 5.7 percent and 3.2 percent, respectively. (Tables 1c, 2c, and 3c)

For **fisheries**, the value of production at constant 2018 prices dropped by 5.5 percent year-on-year in the third quarter of 2024. Its total production amounted to PhP 55.48 billion or 14.0 percent of the total value of production in agriculture and fisheries.

The following fisheries commodities exhibited reductions in the value of production at constant 2018 prices:

- a. grouper (lapu-lapu), 31.9 percent;
- b. big-eyed scad (matangbaka), 23.0 percent;
- c. fimbriated sardines (tunsoy), 18.9 percent;
- d. Indian mackerel (alumahan), 18.8 percent.

- e. yellowfin tuna (tambakol/bariles), 18.6 percent;
- f. roundscad (galunggong), 17.2 percent;
- g. tiger prawn (sugpo), 16.7 percent;
- h. mudcrab (alimango), 14.8 percent;
- i. slipmouth (sapsap), 14.7 percent;
- j. squid (pusit), 11.9 percent;
- k. frigate tuna (tulingan), 7.5 percent;
- l. milkfish (bangus), 6.9 percent;
- m. *Bali sardinella* (tamban), 6.7 percent;
- n. cavalla (talakitok), 4.6 percent;
- o. tilapia, 4.2 percent;
- p. seaweeds, 1.5 percent; and
- q. other fisheries, 0.6 percent.

Meanwhile, the value of production registered increments for the following fisheries commodities:

- a. bigeye tuna (tambakol/bariles), 40.1 percent;
- b. *P. Vannamei*, 19.4 percent;
- c. skipjack (gulyasan), 18.9 percent;
- d. blue crab (alimasag), 9.5 percent; and
- e. threadfin bream (bisugo), 7.2 percent.

(Tables 1.4, 2.4, and 3.4)
