is available in electronic format (Excel/Word/PDF).

FOREWORD

The Philippine Statistics Authority (PSA) releases the First Quarter 2022 Value of Production in Philippine Agriculture and Fisheries.

The report covers all agricultural commodities, highlighting 22 commodities for crops, nine commodities for livestock and poultry, and 20 commodities for fisheries. It presents the value of agricultural production at constant 2018 prices and at current prices.

PSA welcomes comments and suggestions from its data users, clients, and stakeholders for the improvement of this report.

TECHNICAL NOTES ON THE PREPARATION OF VALUE OF PRODUCTION IN PHILIPPINE AGRICULTURE AND FISHERIES REPORT

The Value of Production in Philippine Agriculture and Fisheries report presents the accomplishments of agriculture and fisheries during a particular reference period. The value of production is at constant 2018 prices and at current prices. The valuation is also done by commodity group (crops, livestock and poultry, and fisheries). These serve as inputs in the estimation of Gross Value Added (GVA) in agriculture and fishery.

The value of production in agriculture and fisheries covers all agricultural commodities, highlighting 22 commodities for crops, nine commodities for livestock and poultry, and 20 commodities for fisheries.

A. Sources of Basic Data

The generation of the value of production requires data on volume of production and farmgate prices. These data are sourced from the following PSA surveys and administrative-based records from other government agencies:

Variable	Source
1. Volume of Production by commodity	
a. Crops	Palay Production Survey (PPS)
	Corn Production Survey (CPS)
	Crops Production Survey (CrPS)
b. Livestock and Poultry by commodity	Backyard Livestock and Poultry Survey (BLPS)
	Commercial Livestock and Poultry Survey (CLPS)
c. Fisheries	Quarterly Municipal Fisheries Survey (QMFS)
	Quarterly Inland Fisheries Survey (QIFS)
	Quarterly Commercial Fisheries Survey (QCFS)
	Quarterly Aquaculture Survey (QAqS)
2. Farmgate Prices	
a. Crops	Farm Prices Survey (FPS)
b. Livestock and Poultry	FPS
c. Fisheries	QMFS
	QIFS
	QCFS
	QAqS
3. Administrative Data	
a. Volume of Production of Centrifugal Sugar and Raw Sugar	Sugar Regulatory Administration (SRA)
b. Dairy Production and Price for Goat and Cattle	National Dairy Authority (NDA)
c. Dairy Production and Price for Carabao	Philippine Carabao Center (PCC)
d. Volume and Value of Commercial Fish Unloadings	Philippine Fisheries Development Authority (PFDA), Local Government Units (LGUs), and Privately Managed Landing Centers
e. Volume and Value of Municipal Fish Unloadings	Philippine Fisheries Development Authority (PFDA) and Local Government Units (LGUs)

B. Estimation Procedure

The valuation of agriculture and fisheries production is prepared quarterly. It is done as follows:

At Constant 2018 Prices

Valuation at constant prices is done by multiplying the quarterly volume of production of each commodity by the 2018 average farmgate price.

Formula:

$$VP_o = Q_t \times FGP_o$$

Where:

VP_o = Value of production at constant 2018 prices;

Q_t = Volume of production for the current period; and

FGP_o = Farmgate price at constant 2018 prices

At Current Prices

Valuation at current prices is done by multiplying the quarterly volume of production of each commodity by the average farmgate price during the reference year.

Formula:

$$VP_t = Q_t \times FGP_t$$

Where:

VP_t = Value of production at current prices;

Q_t = Volume of production for the current period; and

FGP_t = Farmgate price at current prices

The average prices of corn, coconut, banana, mango, tobacco, coffee, and onion are weighted using varietal classification, while, cassava price is weighted by its use (i.e., food and industrial).

For sugarcane, there is no available data on sugarcane price. The PSA's Farm Prices Survey (FPS) generates prices of centrifugal sugar per kilogram while the Sugar Regulatory Administration (SRA) releases data on volume of centrifugal sugar and raw sugar. Thus, the farmgate price of sugarcane was derived by multiplying the volume of raw sugar by the price of centrifugal sugar. The resulting value is multiplied by 0.65 to indicate that 65 percent of the total value of raw sugar produced is the value of the product of agriculture. This is based on the prevailing 65-35 planter-miller sharing system. The total value credited to agriculture was divided to the total volume of sugarcane to derive the average price of sugarcane.

To harmonize the product form of coffee for the volume of production and price, conversion is made for the price. The farmgate price of dried coffee beans is multiplied by 60 percent (Food and Agriculture Organization's conversion factor from dried coffee beans to dried coffee berries¹) to derive the farmgate price of dried coffee berries.

In the case of "other crops", a set of indicator commodities was established. These indicator commodities are used to get the weighted price for "other crops". It is derived by dividing total value of production by the total volume of production of the indicator commodities. This weighted price is used in computing the value of "other crops" production.

The prices of livestock and poultry are weighted using the type of farm (i.e., commercial and backyard).

For fisheries commodities, the prices are derived from the value of production at current prices divided by the volume of production of the reference year.

C. Definitions

Value of Production at Constant (2018) Prices – refers to valuation of transactions, wherein the influence of price changes from the base year (2018) to the current year has been removed.

Value of Production at Current Prices – is the value based on prices during the reference year.

VALUE OF PRODUCTION IN PHILIPPINE AGRICULTURE AND FISHERIES
FIRST QUARTER 2022

HIGHLIGHTS

Figure 1. Value of Production in Agriculture and Fisheries at Constant 2018 Prices
Growth Rates
Q1 2021 and Q1 2022

Source: Philippine Statistics Authority

The **value of production in agriculture and fisheries at constant 2018 prices**¹ contracted by -0.3 percent in the first quarter of 2022. Reductions in the value of crops, livestock, and fisheries production were recorded. On the other hand, value of poultry production increased during the period. At current prices, the value of production in agriculture and fisheries amounted to PhP 498.61 billion which was 2.1 percent higher from the previous year's level. (Table 2a, Table 4a and Table 5a, and Figure 1)

Crops posted a -1.6 percent decrease in the value of production in the first quarter of 2022. It accounted for 58.0 percent of the total value of production in agriculture and fisheries. Palay and corn production registered declines by -1.9 percent and -0.2 percent, respectively. However, two-digit expansions were registered by abaca at 14.1 percent, and potato at 11.7 percent. Increases in the value of production were likewise noted for cacao by 6.0 percent, onion by 4.2 percent, eggplant by 4.0 percent, coconut by 2.0 percent, pineapple by 1.0 percent, ampalaya by 0.8 percent, and mungo by 0.04 percent.

Meanwhile, the value of production for tobacco went down by -24.1 percent, sugarcane by -10.1 percent, cabbage by -7.3 percent, tomato by -6.1 percent, mango by -4.0 percent, coffee by -3.9 percent, banana by -3.3 percent, cassava by -2.6 percent, calamansi by -1.5 percent, sweet potato by -0.9 percent, and rubber

¹All value of production growth rates are at constant 2018 prices

by -0.3 percent. The value of production of “other crops” grew by 1.0 percent. At current prices, the value of crop production at PhP 268.13 billion indicated a -0.9 percent drop from the previous year’s record. (Tables 2b, 3b, 4b, and 5b)

The value of **livestock** production declined by -1.0 percent in the first quarter of 2022. It contributed 14.1 percent to the total value of production in agriculture and fisheries. The respective values of dairy and carabao production posted 22.2 percent and 6.5 percent increments during the period. Conversely, decreases were recorded for goat by -7.5 percent, cattle by -1.6 percent, and hog by -1.2 percent. At current prices, the value of livestock production which amounted to PhP 89.89 billion was 9.7 percent higher than the previous year’s record. (Tables 2c, 3c, 4c, and 5c)

Poultry, which accounted for 15.0 percent of the total value of agriculture and fisheries production increased by 12.3 percent during the first quarter of 2022. Improvements in the value of production were noted for chicken by 13.0 percent, chicken eggs by 12.4 percent, and duck eggs by 11.8 percent. Meanwhile, duck recorded a -21.5 percent drop in the value of production. At current prices, poultry production was valued at PhP 75.17 billion, an increase of 8.8 percent this quarter. (Tables 2c, 3c, 4c, and 5c)

For **Fisheries**, value of production contracted by -5.8 percent. It contributed 12.9 percent to the total value of production in agriculture and fisheries. Increments in the value of production were exhibited for threadfin bream (bisugo) by 34.1 percent, squid (pusit) by 12.7 percent, bigeye tuna (tambakol/bariles) by 10.9 percent, seaweed by 9.1 percent, yellowfin tuna (tambakol/bariles) by 7.6 percent, and grouper (lapu-lapu) by 6.0 percent.

On the other hand, double-digit declines were noted for mudcrab (alimango) by -24.8 percent, skipjack (gulyasan) by -20.2 percent, fimbriated sardines (tunsoy) by -13.5 percent, milkfish (bangus) by -12.7 percent, tiger prawn (sugpo) by -11.3 percent, and slipmouth (sapsap) by -10.0 percent. Reductions in production were also recorded for blue crab (alimasag) by -8.2 percent, big-eyed scad (matangbaka) by -7.1 percent, tilapia by -6.4 percent, cavalla (talakitok) by -6.0 percent, frigate tuna (tulingan) by -5.7 percent, Indian mackerel (alumahan) by -5.6 percent, roundscad (galunggong) by -4.9 percent, and *Bali sardinella* (tamban) by -0.3 percent. Collectively, the value of “other fisheries” increased by 1.1 percent during the quarter. At current prices, the value of fisheries production amounted to PhP 65.42 billion, or -2.2 percent lower compared to the previous year’s level. (Tables 2d, 3d, 4d, and 5d)

¹All value of production growth rates are at constant 2018 prices
