OCTOBER 2020

FOREWORD

The Philippine Statistics Authority (PSA) releases the 20th edition of the Regional Agricultural Production Accounts report. Following the overall revision and rebasing of the National Accounts of the Philippines, this edition presents the revised and rebased to 2018 Performance of Agriculture in the 16 regions of the country. It contains revision on the coverage of the highlighted commodities for crops and fisheries which are important and priority agricultural commodities of the regions.

This report presents highlights of the regional performance of agriculture for 2019. The regional statistical tables include data on volume and value of production at constant 2018 prices and current prices, percentage distribution of value of production, and farmgate prices by commodity covering the period 2017 to 2019.

PSA welcomes comments and suggestions from its data users, clients, and stakeholders for the improvement of this report.

DENNIS S. MAPA, Ph.D.

TECHNICAL NOTES ON THE PREPARATION OF REGIONAL AGRICULTURAL PRODUCTION ACCOUNTS REPORT

The Regional Agricultural Production Accounts report presents the annual performance of agriculture in the 16 regions of the country. The performance is measured in terms of value of production at constant 2018 prices and at current prices. It focuses on the measurement of the whole agriculture and its sub-commodity group (crops, livestock, poultry, and fisheries) and commodity. These serve as inputs in the estimation of Gross Value Added (GVA) in agriculture and fishery at the regional level.

With the Overall Revision and Rebasing to 2018 of the Gross Regional Domestic Product (GRDP) as approved in PSA Resolution No. 11, series of 2018, "Approving the General Policy on the Revision and Rebasing of the PSNA", the revision and rebasing of the regional valuation of the performance of agriculture should also be done. This aims to include additional and more comprehensive data to reflect the most recent structure of the agriculture and fishery sector at the regional level.

Criteria in the Selection of Highlighted Commodities

The valuation of the regional performance of agriculture covers all agricultural commodities, highlighting selected commodities. A Consultation Workshop with Stakeholders in Agriculture and Fisheries Sector was conducted in the 16 regions of the country. It aimed to solicit inputs on the identification of commodities to be highlighted in the regional report. The workshop was participated by the different Local Government Units (LGUs), regional government line agencies, Farmers' Cooperatives/Associations, Livestock and Poultry Integrators, Fisheries Cooperatives/Associations, academe and individual farm/fishpond operators.

The final highlighted commodities vary across regions. The selection of the highlighted commodities for each region was based on the rank of the values of production at constant 2018 prices, inputs from stakeholders in the agriculture and fisheries sector during the regional consultation workshops and from commodity specialists. Factors considered in choosing the highlighted commodities were high volume of production, high value commodity, high consumption, priority/program commodities and representation to commodity groups (e.g., cereals, fruits, legumes, citrus, condiments, fruit and leafy vegetables, and non-food and industrial crops, commercial fisheries, municipal fisheries and aquaculture).

The 22 highlighted crop commodities for each region shared about 89 percent to 98 percent to the region's total crop production during the base year 2018. In the case of fisheries, 20 commodities were highlighted in all the regions except for CAR which only covered nine (9) commodities. The contribution of these highlighted commodities to the region's total fisheries production ranged from 62 percent to 97 percent. Meanwhile, all commodities included in the livestock and poultry data system were highlighted in the regions.

REGIONAL AGRICULTURAL PRODUCTION ACCOUNTS

Sources of Basic Data

The generation of the regional value of production requires data on volume of production and farmgate prices. These data are sourced from the following PSA surveys and administrative-based records from other government agencies:

Variable	Source
1. Volume of Production by commodity	
a. Crops	Palay Production Survey (PPS)
	Corn Production Survey (CPS)
	Crops Production Survey (CrPS)
b. Livestock and Poultry	Backyard Livestock and Poultry Survey
	Commercial Livestock and Poultry Survey
	Compilation of Data from Slaughterhouses and Poultry Dressing Plants
c. Fisheries	Quarterly Municipal Fisheries Survey
	Quarterly Inland Fisheries Survey
	Quarterly Commercial Fisheries Survey
2. Farmgate Prices	
a. Crops	Farm Prices Survey
b. Livestock and Poultry	Farm Prices Survey
c. Fisheries	Quarterly Municipal Fisheries Survey
	Quarterly Inland Fisheries Survey
	Quarterly Commercial Fisheries Survey
	Quarterly Aquaculture Survey
3. Administrative Data	
a. Volume of Production of Centrifugal Sugar and Raw Sugar	Sugar Regulatory Administration (SRA)
b. Number of Slaughtered/ Dressed Animals	National Meat Inspection Service (NMIS)
c. Number of Slaughtered/ Dressed Animals	Local Government Units (LGUs)
d. Volume and Value of Commercial Fish Unloadings	Philippine Fisheries Development Authority (PFDA), Local Government Units (LGUs) and Privately Managed Landing Centers
e. Volume and Value of Municipal Fish Unloadings	Philippine Fisheries Development Authority (PFDA) and Local Government Units (LGUs)

Estimation Procedure

At Constant 2018 Prices

Formula:

$$VP_o = Q_t \times FGP_o$$

Where:

VP_o = Value of production at constant prices;

Q_t = Volume of production for the current period; and

FGP_o = Farmgate price at constant 2018 prices

At Current Prices

Formula:

$$VP_t = Q_t \times FGP_t$$

Where:

VP_t = Value of production at current prices;

Q_t = Volume of production for the current period; and

FGP_t = Farmgate price at current prices

Definitions

Value of Production at Constant Prices – refers to valuation of transactions, wherein the influence of price changes from the base year to the current year has been removed.

Value of Production at Current Prices - is the value based on prices during the reference year.

REGIONAL AGRICULTURAL PRODUCTION ACCOUNTS

.....

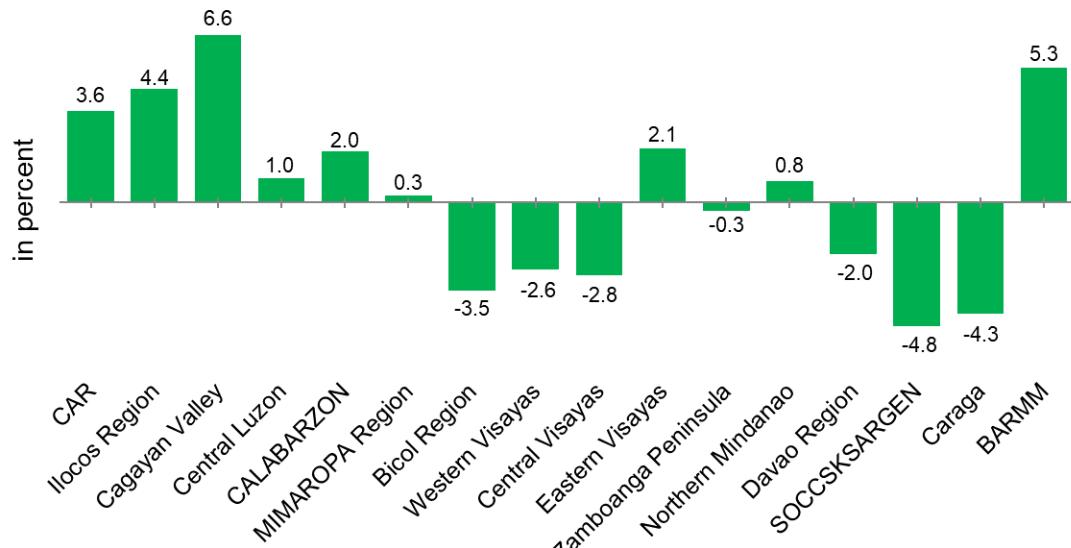

Highlights of the 2019 Regional Performance of Agriculture

I. Production Performance

In 2019, Cagayan Valley recorded the biggest growth in **agricultural production** at 6.6 percent, with crops and livestock contributing to the increment. BARMM followed with 5.3 percent due to output expansion in crops, livestock, poultry, and fisheries. Ilocos Region came third with 4.4 percent growth, attributed to the improvements in crops and fisheries production. The 3.6 percent growth in the agricultural output in CAR was driven by the increase in crop production. Increases in agricultural production were also exhibited by Eastern Visayas at 2.1 percent, CALABARZON at 2.0 percent, Central Luzon at 1.0 percent, Northern Mindanao at 0.8 percent, and MIMAROPA Region at 0.3 percent (Table 1.1 and Figure 1).

Meanwhile, contractions in agricultural outputs were highest in SOCCSKSARGEN at 4.8 percent and Caraga at 4.3 percent. Likewise, agricultural production went down in Bicol Region by 3.5 percent, Central Visayas by 2.8 percent, Western Visayas by 2.6 percent, Davao Region by 2.0 percent, and Zamboanga Peninsula by 0.3 percent.

**Figure 1. Growth Rates of Value of Production in Agriculture
at Constant 2018 Prices, by Region, 2018 to 2019**

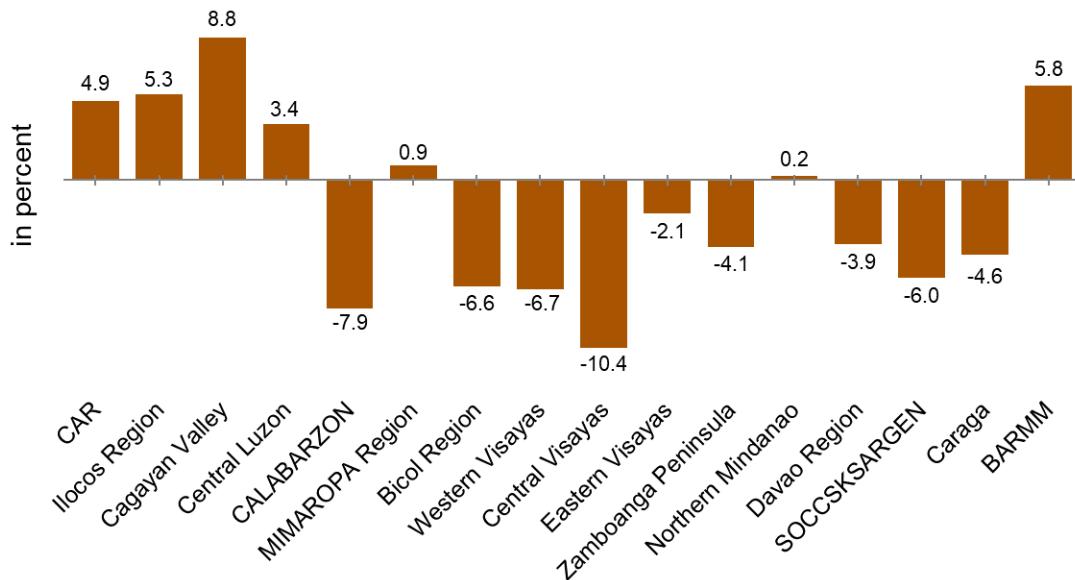

Source: Philippine Statistics Authority

For **crops**, Cagayan Valley posted the highest increase in production at 8.8 percent in 2019. This was followed by BARMM with 5.8 percent, Ilocos Region with 5.3 percent, and CAR with 4.9 percent. Crop production grew by 3.4 percent in Central Luzon, by 0.9 percent in MIMAROPA Region, and by 0.2 percent in Northern Mindanao. On the other hand, output decreases were registered in Central Visayas at 10.4 percent, CALABARZON at 7.9 percent, Western Visayas at

REGIONAL AGRICULTURAL PRODUCTION ACCOUNTS

6.7 percent, Bicol Region at 6.6 percent, and SOCCSKSARGEN at 6.0 percent. Declines were also noted in Eastern Visayas, Davao Region, Zamboanga Peninsula, and Caraga with negative growth rates ranging from 2.1 percent to 4.6 percent (Figure 1.1).

Figure 1.1. Growth Rates of Value of Production in Crops
at Constant 2018 Prices, by Region, 2018 to 2019

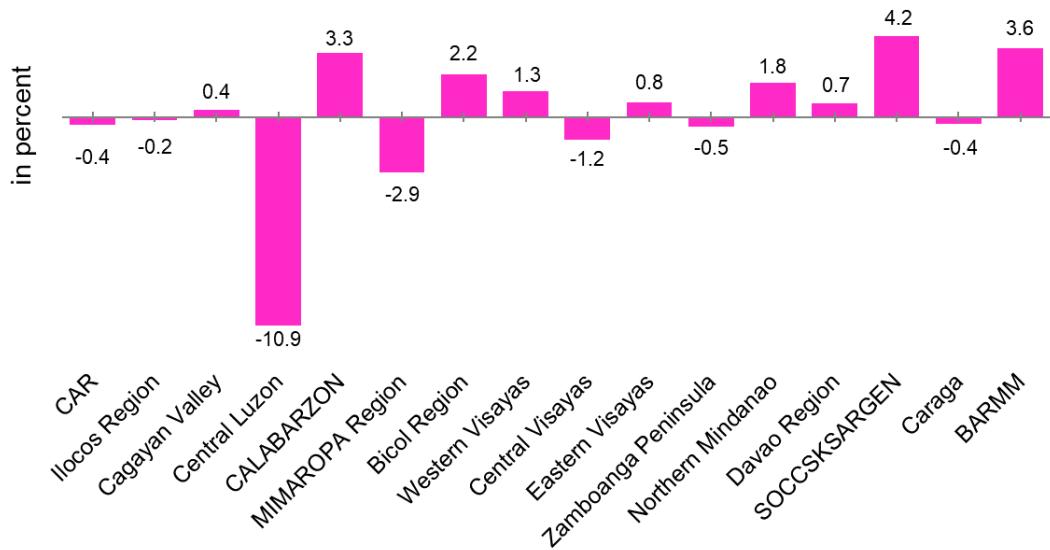

Source: Philippine Statistics Authority

The biggest improvement in **livestock** production was recorded in SOCCSKSARGEN at 4.2 percent, followed by BARMM at 3.6 percent, CALABARZON at 3.3 percent, and Bicol Region at 2.2 percent. Outputs also went up in Northern Mindanao by 1.8 percent and in Western Visayas by 1.3 percent. Less than 1.0 percent increment in livestock production was noted each in Eastern Visayas, Davao Region, and Cagayan Valley. On the other hand, double-digit contraction was observed in Central Luzon at 10.9 percent. This was distantly followed by MIMAROPA Region at -2.9 percent and Central Visayas at -1.2 percent. In the regions of Zamboanga Peninsula, CAR, Caraga and Ilocos Region, livestock production dropped by less than 1.0 percent during the year (Figure 1.2).

REGIONAL AGRICULTURAL PRODUCTION ACCOUNTS

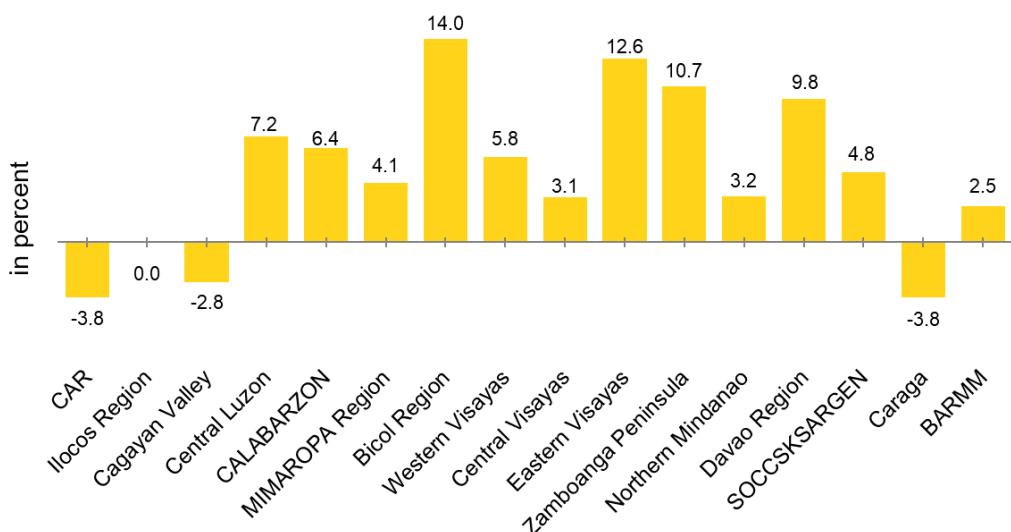

Figure 1.2. Growth Rates of Value of Production in Livestock at Constant 2018 Prices, by Region, 2018 to 2019

Source: Philippine Statistics Authority

For **poultry** production, double-digit increments were noted in Bicol Region at 14.0 percent, Eastern Visayas at 12.6 percent, and Zamboanga Peninsula at 10.7 percent. Improvements in outputs were also higher in Davao Region at 9.8 percent, Central Luzon at 7.2 percent, and CALABARZON at 6.4 percent. Moreover, production growths ranging from 2.5 percent to 5.8 percent were recorded in BARMM, Central Visayas, Northern Mindanao, MIMAROPA Region, SOCCSKSARGEN, and Western Visayas. In CAR and Caraga, poultry outputs decreased by 3.8 percent each, while Cagayan Valley recorded a 2.8 percent reduction (Figure 1.3).

Figure 1.3. Growth Rates of Value of Production in Poultry at Constant 2018 Prices, by Region, 2018 to 2019

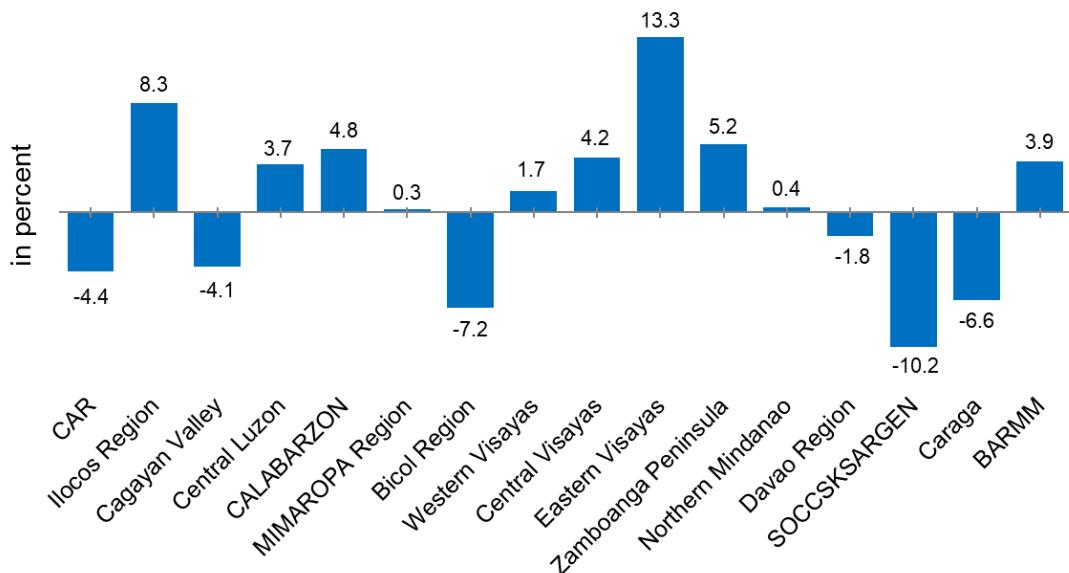

Source: Philippine Statistics Authority

REGIONAL AGRICULTURAL PRODUCTION ACCOUNTS

Expansion in **fisheries** production was noted in Eastern Visayas at 13.3 percent, highest among the regions. Improved production levels were also reported in Ilocos Region by 8.3 percent, Zamboanga Peninsula by 5.2 percent, CALABARZON by 4.8 percent, Central Visayas by 4.2 percent, BARMM by 3.9 percent, and Central Luzon by 3.7 percent. On the other hand, declines in fisheries production, lead by a double-digit drop of 10.2 percent in SOCCSKSARGEN, were noted in the following: Bicol Region by 7.2 percent, Caraga by 6.6 percent, CAR by 4.4 percent, and Cagayan Valley by 4.1 percent. The least output contraction was exhibited by Davao Region at 1.8 percent (Figure 1.4).

Figure 1.4. Growth Rates of Value of Production in Fisheries
at Constant 2018 Prices, by Region, 2018 to 2019

Source: Philippine Statistics Authority

II. Value of Production in Agriculture at Current Prices

In 2019, the growth in the value of **agricultural production** was highest in Davao Region at 7.0 percent. This was followed by BARMM at 4.2 percent and Northern Mindanao at 0.8 percent. Other regions recorded decreases in the value of agricultural outputs, lead by two-digit declines exhibited by Bicol Region and Central Luzon at 12.6 percent and 10.5 percent, respectively. Likewise, reductions were noted in Western Visayas at 8.3 percent, CAR and MIMAROPA Region at 8.1 percent each, Caraga at 7.4 percent, Eastern Visayas at 5.8 percent, Central Visayas at 5.4 percent, and Zamboanga Peninsula at 5.3 percent. CALABARZON showed the lowest decline in the value of agricultural production at 0.6 percent (Table 1.2).

The value of **crop** production grew by 9.3 percent in Davao Region and by 3.8 percent in BARMM. Meanwhile, double-digit decreases were recorded in the following regions

namely; Central Luzon at 20.6 percent, Bicol Region at 20.4 percent, CALABARZON at 18.6 percent, Central Visayas at 17.5 percent, Eastern Visayas at 13.7 percent, Caraga at 12.9 percent, Western Visayas at 12.8 percent, Zamboanga Peninsula at 12.2 percent, and MIMAROPA Region and CAR at 10.1 percent each. Smallest contraction of 0.6 percent in the value of crop production was recorded in Northern Mindanao.

Increases in the value of **livestock** production were noted only in BARMM at 8.1 percent and Northern Mindanao at 2.2 percent. The biggest reductions were registered in Central Luzon at 21.1 percent, Western Visayas at 11.9 percent, MIMAROPA Region at 10.1 percent, Bicol Region at 8.7 percent, CALABARZON at 8.2 percent, and Zamboanga Peninsula at 8.0 percent. The lowest decrease was recorded in Caraga at 0.7 percent.

For **poultry**, CALABARZON posted the biggest growth in output value at 17.8 percent. Similarly, double-digit increments were noted in Zamboanga Peninsula at 14.3 percent, Bicol Region at 11.5 percent, and MIMAROPA Region at 10.9 percent. Other regions with increasing output values were CAR, Central Luzon, Western Visayas, Central Visayas, Northern Mindanao, Davao Region and SOCCSKSARGEN which ranged from 0.7 percent to 8.9 percent. In BARMM and Eastern Visayas, the values of poultry outputs were down by 15.8 percent and 10.1 percent, respectively. Ilocos Region exhibited the least reduction at 2.3 percent.

The fastest growth in the value of **fisheries** production was registered in Eastern Visayas at 22.4 percent. This was followed by Ilocos Region and Central Visayas with 14.1 percent increment each. Meanwhile, output values dropped in MIMAROPA Region by 4.2 percent, Bicol Region by 4.0 percent, CAR by 2.4 percent, and Cagayan Valley by 0.7 percent. The rest of the regions exhibited increases in the value of fisheries production.

III. Regional Shares in the Agricultural Production

Among regions, Central Luzon accounted for the biggest share in the country's **agricultural production** at 14.8 percent in 2019. This was followed by Northern Mindanao with 9.7 percent and Western Visayas with 9.2 percent. Meanwhile, Caraga and CAR had the least shares of 1.7 percent and 2.0 percent, respectively (Table 1.3).

For **crops**, Northern Mindanao and Central Luzon topped with respective shares of 11.2 percent and 10.2 percent of the total crop output. The smallest contribution was recorded in Caraga at 2.3 percent, and CAR and Central Visayas at 2.6 percent each.

REGIONAL AGRICULTURAL PRODUCTION ACCOUNTS

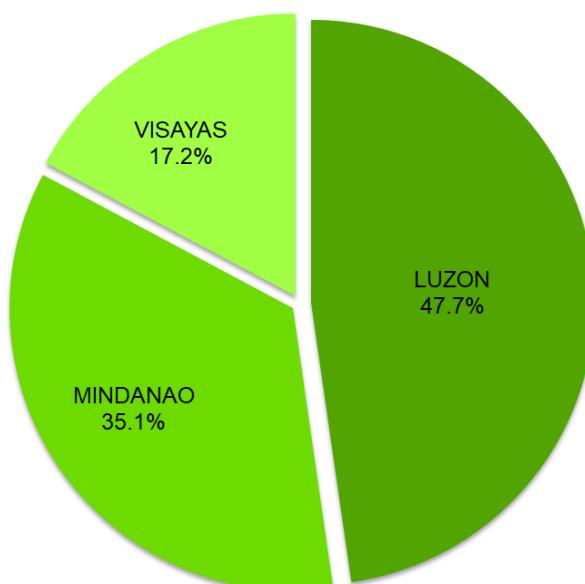

The major contributor in **livestock** production was Central Luzon which shared 17.6 percent. This was followed by CALABARZON at 16.6 percent. The least shares were registered in CAR and BARMM at 1.3 percent each and Caraga at 1.5 percent.

In the case of **poultry**, Central Luzon was the biggest producer, contributing 29.6 percent to the country's poultry production, followed by CALABARZON which accounted for 18.8 percent. Meanwhile, less than 1.0 percent share was contributed each by CAR, MIMAROPA Region, and BARMM.

The leading regions for **fisheries** production were Central Luzon, Western Visayas, and CALABARZON which shared 14.7 percent, 11.6 percent, and 10.9 percent, respectively. Fisheries outputs in CAR comprised the least at 0.2 percent.

IV. Shares in Agricultural Production by Major Island Group

Figure 2. Percentage Share in Total Value of Production in Agriculture at Constant 2018 Prices, by Major Island Group, 2019

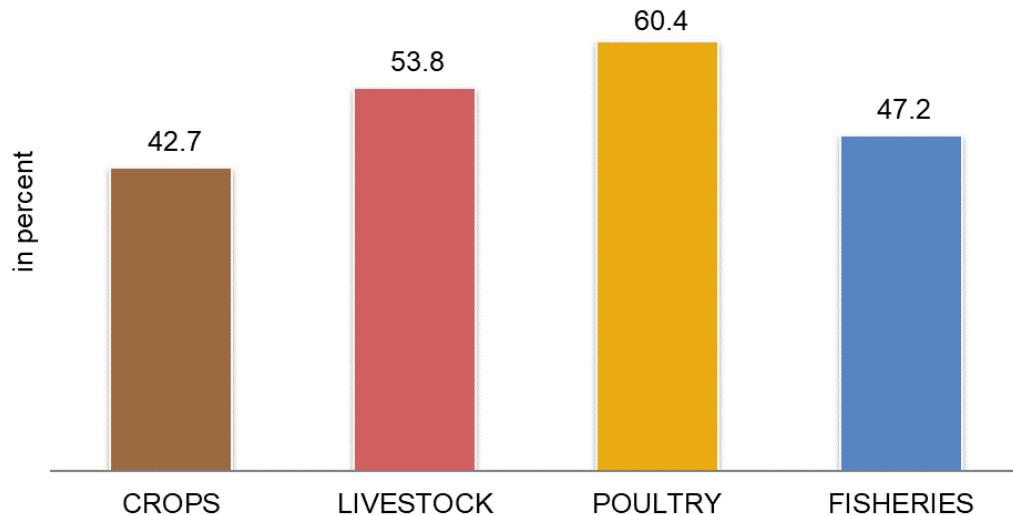

Source: Philippine Statistics Authority

Luzon shared the biggest in the country's total agricultural production at 47.7 percent. Likewise, this island group got the biggest production shares in crops at 42.7 percent, livestock at 53.8 percent, poultry at 60.4 percent, and fisheries at 47.2 percent (Table 1.7 and Figure 2.1).

REGIONAL AGRICULTURAL PRODUCTION ACCOUNTS

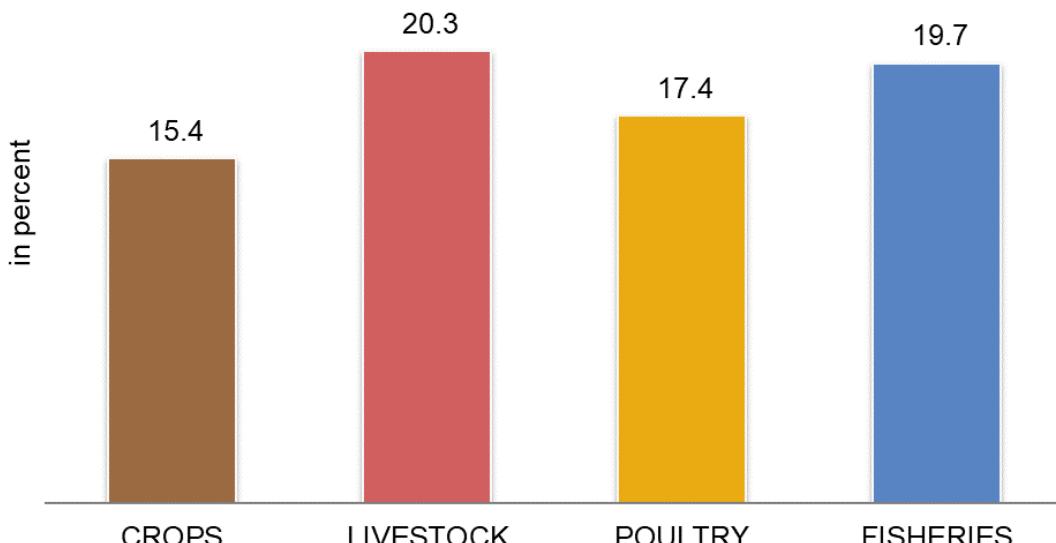

Figure 2.1. Percentage Share in Total Value of Production in Agriculture at Constant 2018 Prices, Luzon, 2019

Source: Philippine Statistics Authority

Visayas contributed the least to the total agricultural output at 17.2 percent. The corresponding shares of each subsector were as follows: crops, 15.4 percent; livestock, 20.3 percent; poultry, 17.4 percent; and fisheries, 19.7 percent (Figure 2.2).

Figure 2.2. Percentage Share in Total Value of Production in Agriculture at Constant 2018 Prices, Visayas, 2019

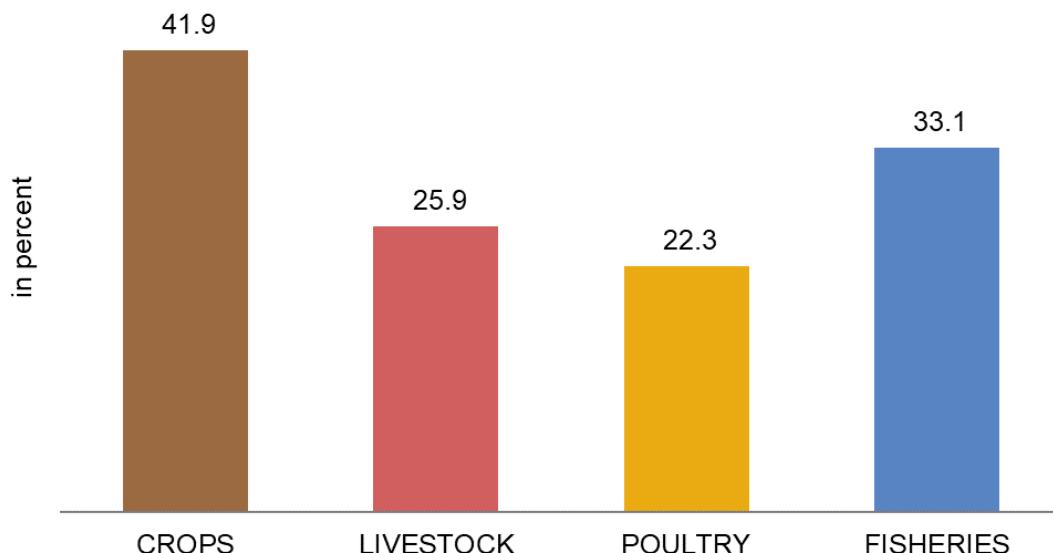

Source: Philippine Statistics Authority

REGIONAL AGRICULTURAL PRODUCTION ACCOUNTS

Mindanao accounted for 35.1 percent of the total agricultural production. The shares were 41.9 percent for crops, 25.9 percent for livestock, 22.3 percent for poultry and 33.1 percent for fisheries (Figure 2.3).
