

PRESS RELEASE

Transportation Sector Consumed 34.8 Percent of the Total Final Energy Consumption in 2023

Date of Release: 14 November 2024

Reference No. 2024-SSO-169

The Compendium of Philippine Environment Statistics is a compilation of environment and related socioeconomic statistics collected from various government agencies. Component 2 Environmental Resources and their Use is one of its components. This component compiles statistics on environmental resources and the benefits they provide to humanity.

Based on the Energy Balance Table of the Department of Energy, the total primary energy supply was recorded at 65.27 million tons of oil equivalent (Mtoe) in 2023, which increased by 6.0 percent compared to 61.56 Mtoe in 2022. The total final energy consumption was recorded at 36.91 Mtoe in 2023, a 2.9 percent increase from 35.86 Mtoe in 2022. Of the total final energy consumption, transport contributed 34.8 percent, 28.5 percent by residential, and 18.9 percent by industry. (Figure 1 and Table 2.7)

Data from the National Water Resources Board showed that the volume of water allocated reached 226.22 billion cubic meters in 2023, a 0.1 percent increase from the 225.92 billion cubic meters of water allocated in 2022. The top three uses of the water allocated were power generation (59.8 percent), irrigation (29.7 percent), and industrial use (6.0 percent). In addition, a total of 24,408 water permits were issued in 2023 from 23,946 issued water permits in 2022. (Figure 2 and Table 2.32).
