1. Value of Production Index (VaPI)

Month-on-month, the seasonally adjusted VaPI for total manufacturing decreased by 3.5 percent in February 2025. In January 2025, a 1.3 percent month-on-month uptick was observed. (Figure 1a, and Tables A and 1)

On the other hand, the seasonally adjusted VaPI for food manufacturing increased in February 2025 at a monthly rate of 8.3 percent from a 2.1 percent monthly increment in the previous month. (Figure 1b, and Tables A and 1)

Furthermore, the seasonally adjusted VaPI of industry divisions other than the manufacture of food are shown in Table 1a.

2. Volume of Production Index (VoPI)

The monthly rate of the seasonally adjusted VoPI for total manufacturing decreased by 3.5 percent in February 2025. Meanwhile, a 1.5 percent month-on-month uptick was observed in January 2025. (Figure 2a, and Tables A and 2)

On the contrary, the monthly rate of the seasonally adjusted VoPI for food manufacturing increased by 3.7 percent during the month from a monthly increment of 6.7 percent in January 2025. (Figure 2b, and Tables A and 2)

In addition, the seasonally adjusted VoPI of industry divisions other than the manufacture of food are shown in Table 2a.

3. Value of Net Sales Index (VaNSI)

In February 2025, the monthly rate of the seasonally adjusted VaNSI for total manufacturing increased by 3.2 percent from a 0.5 percent monthly decrement in January 2025. (Figure 3a, and Tables A and 3)

Likewise, a monthly increment of 0.4 percent was observed in the seasonally adjusted VaNSI for food manufacturing during the period. In January 2025, a month-on-month decrement of 0.5 percent was recorded. (Figure 3b, and Tables A and 3)

Furthermore, the seasonally adjusted VaNSI of industry divisions other than the manufacture of food are shown in Table 3a.

4. Volume of Net Sales Index (VoNSI)

Month-on-month, the seasonally adjusted VoNSI for total manufacturing increased at a monthly rate of 3.4 percent in February 2025 from a 0.6 percent monthly decrease observed in January 2025. (Figure 4a, and Tables A and 4)

In contrast, the monthly rate of the seasonally adjusted VoNSI for food manufacturing decreased by 0.8 percent in February 2025. Meanwhile, a 0.8 percent month-on-month uptick was observed in January 2025. (Figure 4b, and Tables A and 4)

Moreover, the seasonally adjusted VoNSI of industry divisions other than the manufacture of food are shown in Table 4a.

Technical Notes

The Monthly Integrated Survey of Selected Industries (MISSI) generates the original series of the Value of Production Index (VaPI), Volume of Production Index (VoPI), Value of Net Sales Index (VaNSI), and Volume of Net Sales Index (VoNSI). These indices provide information on the performance of growth-oriented industries in the manufacturing section.

This special release features the seasonally adjusted VaPI, VoPI, VaNSI, and VoNSI using X-13 Auto-Regressive Integrated Moving Average (ARIMA) of JDemetra+. The seasonally adjusted series show the trend of value and volume of production and net sales of the manufacturing section without the effects of seasonal factors.

The decomposition model chosen for the seasonal adjustment for each index is shown below.
