FOREWORD

The interrelationship between population and development has always been an important consideration when charting programs to achieve a better quality of life. Programs for better health services, adequate nutrition, free education, housing for all and social welfare to the needy can only be planned properly if adequate and accurate data are available.

The results of the 1995 Census of Population, or POPCEN, provides updated data not only at the national level but more importantly at the local level. While the POPCEN was conducted mainly to provide an updated basis for the apportionment of the Internal Revenue Allocation (IRA) to the local government units in the country, it remains a useful data source to chart the future of a community effectively.. The POPCEN may also be used as a gauge to evaluate if plans and programs are implemented objectively.

This report presents the population of the Philippines as of September 1, 1995. It provides data at both the provincial and municipality levels. It presents, among others, the distribution of the population by various socio-demographic characteristics as well as a profile of the disabled persons by type of disability and of the trade skill of the population.

This publication was made a reality by the more than 30,000 hired census field workers who toiled the sun and rain to count each and every individual in the country for the mid-decade census. We salute them for their dedication to this undertaking. Our deep appreciation also goes to our respondents from the northernmost island of Batanes to the southernmost island in Tawi-tawi and to the various entities and individuals, both government and non-government, who contributed their time and effort especially in the operations phase of the POPCEN. The successful conduct of the 1995 POPCEN is a proof that it is truly a "CeNSOng Pambayan, Sandigan ng Kaunlaran."

EXPLANATORY NOTE

1995 Census of Population

Introduction

In September 1995, the National Statistics Office conducted the 1995 Census of Population (POPCEN). This nationwide undertaking is the 10th population census conducted in the country.

Like the 1990 census, the 1995 POPCEN is designed to take an inventory of the total population in the Philippines and to collect information about their characteristics. The data will provide an updated basis for the apportionment of the Internal Revenue Allocation (IRA) to local government units and for the creation of new legislative areas such as regions, provinces, municipalities and barangays or the conversion of a municipality into a city. The census of population is the source of information on the size and distribution of the population as well as information about the demographic, social, economic and cultural characteristics. These information are vital for making rational plans and programs for development.

Pursuant to the provision of Batas Pambansa Blg. 72, a final report on the population count, and number of households at the barangay level was submitted to the President and declared official, for all purposes, under Proclamation No. 849 dated August 14, 1996.

Authority for Conducting the 1995 Census of Population

Under Commonwealth Act No. 591, the Bureau of the Census and Statistics (now

National Statistics Office) is authorized to prepare for and undertake all censuses of population, agriculture, industry and commerce.

Batas Pambansa Blg. 72, which was passed on June 11, 1980, further accorded the National Statistics Office the authority to conduct population censuses every ten years beginning in 1980 without prejudice to the undertaking of special censuses on agriculture, industry, commerce, housing and other sectors as may be approved by the National Economic and Development Authority (NEDA).

More recently, Executive Order No. 121, otherwise known as the Reorganization Act of the Philippine Statistical System, which was passed on January 30, 1987, declared that the NSO shall be the major statistical agency responsible for generating general purpose statistics and undertaking such censuses and surveys as may be designated by the National Statistical Coordination Board (NSCB).

On May 30, 1993, the NSCB approved the conduct of a mid-decade population census through NSCB Resolution 6-93. The 1995 POPCEN was under the overall supervision of the NSCB, which is chaired by the Director General of the NEDA. The NSCB membership consists of representatives (undersecretary level) of the various executive departments, including the Administrator of the NSO. With respect to the POPCEN, the NSO Administrator is the Executive Officer of the NSCB.

1995 Census of Population

Census Coordinating Councils

For the 1995 POPCEN, the creation of Provincial Census Coordinating Councils (PCCC) and City/Municipal Census Coordinating Councils (C/MCCC) was authorized by NSCB Resolution No. 3, Series of 1995. The Provincial Statistics Officer (PSO) and District Statistics Officer (DSO) were responsible for organizing the PCCC and C/MCCC, respectively. These councils assisted the NSO field staff in the conduct of the POPCEN at the subnational level.

The Provincial Governor was the Chairman of the Provincial Census Coordinating Council (PCCC) with the Division Superintendent of the Department of Education, Culture and Sports (DECS) as Vice Chairman. The District Highway Engineer, the Provincial Commander of the Philippine Constabulary, the Provincial Planning & Development Officer, and three representatives from the private sector served as members. The Provincial Statistics Officer of the NSO acted as the Executive Officer of the PCCC.

The City/Municipal Census Coordinating Council (C/MCCC) was chaired by the City/Municipal Mayor as Chairman. The DECS Supervisor or Supervising Principal, Station Commander, Municipal Civil Registrar, Municipal Planning and Development Officer, and a representative from the private sector acted as members. The District Statistics Officer/Statistical Coordination Officer of the NSO served as Executive Officer of the C/MCCC.

Census Organization

The 1995 POPCEN was supervised and coordinated by the Household Statistics Department (HSD) under the direction and instructions of the Administrator. The planning and preparatory activities for all aspects of the census was undertaken by the HSD in close coordination with the support divisions. Information Resources Division (IRD), Human Resources & Management Division (HRMD), Financial Services Division (FSD), and the Administrative Services Division (ASD). A Technical and Administrative Group (TAG), headed by the Chief of the HSD, oversaw the ten working groups created for this purpose.

The TAG was under the direction and supervision of a Steering Committee chaired by the Administrator and co-chaired by the Deputy Administrator. It was comprised of the HSD Chief and its division chiefs; Chiefs of the IRD, HRMD, FSD and ASD; Regional Administrator (RA) of NCR as field representative; and Chief of the Legal Section.

The HSD Chief is assisted by the Census Project Staff (CPS) in the coordination of working groups of the TAG and in the communication flow between Central Office (CO) units and the field offices. The CPS also served as Secretariat to the Steering Committee and as POPCEN monitoring, communications and action center. The Head of the CPS is an ex-officio member of the TAG.

The RA acted as the regional census coordinator for his region, while the PSO

Explanatory Note

acted as the provincial census executive officer for his province.

During the POPCEN field operations, each NSO District Office within a province served as operations center under the direct supervision of the District Statistics Officer (DSO). For the POPCEN, the DSO was designated as the District Area Supervisor (DAS). In special cases, CO allowed a province to create sub-district offices for purposes of census supervision. The PSO assigned a regular field staff i.e., the Statistical Coordination Officers (SCOs)/ Assistant Statistical Coordination Officers (ASCOs) to run this sub-district office.

For the field enumeration, a group of census enumerators (ENs) was supervised by a team supervisor (TS) and a group of TS, by a Census Area Supervisor (CAS). NSO SCOs/ASCOs were designated as CAS. The DAS supervised all CAS, TS and ENs of the municipalities covered by the District or Subdistrict Office.

Method of Enumeration

The gathering of population data was performed by census enumerators through house-to-house visits and interview of a responsible member of each household. The household was used as the enumeration unit. However, a complete listing of buildings which contain living quarters, including vacant ones, as well as housing units was done.

The households were interviewed using the Household Questionnaire (CP Form 2). The items asked on population were household membership, relationship to head, whether or not a person was an overseas worker (OCW), date of birth, age as of last birthday, sex, civil status, disability, ethnicity, highest grade completed, trade skills and economic activity.

Institutional households were enumerated using the Institutional Population Questionnaire (CP Form 3). All items in CP Form 2 were also asked except for item OCW where residence status was asked instead.

Information about households of Filipinos working in the Philippine Embassies, Consulates and Missions in foreign countries, were also gathered and included in the total population of the country.

Place Where Enumerated

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides.

Filipinos working in Philippine Embassies/Consulates and Missions abroad were also enumerated. CP Form 2 questionnaires were sent to them through the Department of Foreign Affairs.

1995 Census of Population

Content and Coverage of this Publication

POPCEN Report No. 2 contains sixteen (16) tables on the population characteristics. Figures on demographic characteristics (age, sex, civil status, disability, ethnicity and household size, education (highest grade completed), trade skills, economic characteristics (industry and class of worker) are based on the household population.

Aside from the Philippine volume, a separate report is published either for a province or highly-urbanized city. To facilitate access to these reports, an alphanumeric code, wherein the alphabetic code represents the region to which a province or highly-urbanized city belongs is provided.

Aside from the published tables, unpublished tables are available to users in computer print-outs or in diskettes (see Appendix C for the list of unpublished tables).

DEFINITION OF TERMS AND CONCEPTS

Barangay

A *barangay* is the smallest political unit in the country. Generally, its enumeration is assigned to one enumerator. For enumeration purposes, a large barangay is usually divided into parts and each part is called an enumeration area (EA).

For purposes of the 1995 POPCEN, the list of barangays, as of September 1,

1995, as prepared by the NSCB Technical Working Group on Geographic Classification, was used as basis for the geographic codes utilized. A total of 41,919 barangays were covered in this census.

Usual Place of Residence

This term refers to the geographic place (street, barangay, municipality, or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time, hence, it may be the same as or different from the place where he was found at the time of the census.

Household

A *household* is a social unit consisting of a person living alone or group of persons who

1. sleep in the same housing unit; and
2. have a common arrangement in the preparation and consumption of food.

In most cases, a household consists of persons who are related by kinship ties, like parents and their children. In some instances, several generations of familial ties are represented in one household while, still in others, even distant relatives are members of the household.

Household helpers, boarders, and non-relatives are considered as members of

Explanatory Note

the household provided they sleep in the same housing unit and have common arrangement for the preparation and consumption of food and do not usually go home to their family at least once a week.

A group of unrelated individuals, as in the case of a group of students or workers, who decide to rent a place and make common arrangements for the preparation and consumption of their food constitutes one household.

Institutional Population

Institutional population comprises persons who are found living in institutional living quarters. They may have their own families or households elsewhere but at the time of the census they are committed or confined in institutions, or they live in institutional living quarters and are usually subject to a common authority or management, or are bound by either a common public objective or a common personal interest.

The following were considered as *institutional living quarters*:

1. Hotels, lodging houses, dormitories
2. Hospitals and nurses' homes
3. Welfare institutions
