FOREWORD

This publication presents the results of the **2018 Census of Philippine Business and Industry (CPBI)**. The 2018 CPBI was conducted nationwide by the Philippine Statistics Authority (PSA) in 2019, with 2018 as the reference period for all data items. It is the PSA's intent that the 2018 CPBI serve as a prime and recent source of information and data on businesses and industries in the Philippines.

Among the data items contained in the 2018 CPBI are: the number of establishments in the country, figures on employment, compensation, revenues, expenses, tangible fixed assets, intangible assets, and inventories, as well as information on value-added, and e-commerce transactions. These data items are presented from the viewpoint of the national and regional levels and disaggregated by industry.

The PSA expects that the 2018 CPBI becomes a useful resource material to both the government and the private sector in the formulation of policies and economic development plans. The results of the 2018 CPBI would not have been realized without the trust accorded to the PSA by the sample establishments. The PSA sincerely recognizes the cooperation of all the establishments in providing and entrusting their data to us for statistical purposes.

EXPLANATORY TEXT

Introduction

The Census of Philippine Business and Industry (CPBI) is one of the three national censuses being conducted by the Philippine Statistics Authority (PSA) as per Republic Act No. 10625 (RA 10625). The CPBI is also a designated statistical activity as per Executive Order No. 352 (EO No. 352), series of 1996.

The 2018 CPBI was the 16th in the series of economic censuses in the country and preceded by those of 2012, 2006, 1999, 1994, 1988, 1983, 1978, 1975, 1972, 1967, 1961, 1948, 1939, 1918, and 1903.

In general, the CPBI aims to collect and generate information on the levels, structure, performance, and trends of economic activities of the formal sector in the entire country for the year 2018. It also serves as benchmark information for the overall revision and rebasing of the National Accounts to 2018.

Specifically, the 2018 CPBI aims:

1. To collect and generate information on employment, revenue, expense, capital expenditures, and total assets of the establishments by industry and by region;
2. To generate indicators such as value added, labor productivity, profitability, and other indicators which are necessary for the evaluation of the performance of industries at the national and regional levels;
3. To generate information on MSME (micro, small and medium establishments/enterprises) based on employment grouping;
4. To generate gender disaggregated statistics on employment;
5. To generate statistics on the research and development (R & D) employment and expenditures of establishments; and
6. To update basic information of establishments and enterprises for the improvement of the Statistical Business Register (SBR).

The 2018 CPBI was conducted from May to September 2019. The reference period of all information gathered is for the whole year of 2018, except for total employment which took a snapshot of the establishment's number of employees as of 15 November 2018.

Uses of CPBI Data

The data collected from the CPBI can be used by the government and the private sector to formulate policies and economic development plans.

Specifically, the CPBI results are used by the:

1. **Policy makers and national and local government units** in the formulation and monitoring of policies and plans based on the economy-wide and sub-national statistics; and, in formulating strategies and plans for the national and regional economic development;
2. **Business community** in evaluating business options, assessing opportunities for new investments, and estimating market shares for their products; and, in the formulation of government strategies to support the industry based on the industry-level statistics;
3. **Researchers/Academe** in studying the technology employed in the production process in terms of input-output relationships and productivity analysis by detailed economic activity, by employment size, by geographical characteristics for regional, national and international analysis, and ownership structure;
4. **Compilers of national accounts** in measuring the annual input/output and valued added generated by economic activities and in compiling supply and use tables by product and industry; and
5. **General public** who are interested in knowing and in evaluating conditions of the economy in order to make more informed decisions.

Legal Authority

The conduct of the 2018 CPBI is authorized by:

- ❖ **Republic Act No. 10625** also known as the **Philippine Statistical Act of 2013** dated September 12, 2013: An act reorganizing and strengthening the Philippine Statistical System (PSS) and its agencies and instrumentalities. It shall be the policy of the State to effect the necessary and proper changes in the organizational and functional structures of the PSS in order to rationalize and promote efficiency and effectiveness in the delivery of statistical services.

Section 6 of RA 10625 states that “the Philippine Statistics Authority (PSA) shall be primarily responsible for all national censuses and surveys, sectoral statistics, consolidation of administrative recording system, and compilation of national accounts.” Specifically, Section 6 (b) of this Act mandates the PSA “to prepare and conduct periodic censuses on population, housing, agriculture, fisheries, **business, industry**, and other sectors of the economy.”

Section 25 of RA 10625 declares that all respondents shall be liable to reply to the statistical inquiry or survey. The respondents under this Act are required to give truthful and complete answers to statistical inquiries or surveys of the PSA and other statistical offices of the PSS.

Section 27 of RA 10625 states that:

“...Respondents of primary data collection activities such as censuses and sample surveys are obliged to give truthful and complete answers to statistical inquiries. The gathering, consolidation and analysis of such data shall likewise be done in the most truthful and credible manner. Any violation of this Act shall result in the imposition of the penalty of one (1) year imprisonment and a fine of One hundred thousand pesos (P100,000.00). In cases where the respondent fails to give truthful and complete answers to such statistical inquiries is a corporation, the above

penalty shall be imposed against the responsible officer, director, manager and/or agent of said corporation. In addition, such erring corporation, enterprise or business concerned, shall be imposed a fine ranging from One hundred thousand pesos (P100,000.00) to Five hundred thousand pesos (P500,000.00)..."

- ❖ **Executive Order No. 352** dated July 1, 1996: **Designation of Statistical Activities that will generate critical data for decision-making by the Government and the Private Sector**

EO 352 ordered the approval of the designated activities and statistics that have been designated by the National Statistical Coordination Board (NSCB) for adoption by the government. Among others, the CPBI is a designated statistical activity and the results generated from the census are designated statistics.

Confidentiality of Information

- ❖ **Republic Act No. 10625 (Philippine Statistical Act of 2013), Section 26** states that:

"...all data furnished by a respondent to statistical inquiries, surveys and censuses of the PSA shall be considered privileged communication and as such shall be inadmissible as evidence in any proceeding. The PSA may release aggregated information from statistical inquiries, surveys and censuses in the form of summaries or statistical tables in which no reference to an individual, corporation, association, partnership, institution or business enterprise shall appear."

Further, **Section 27 of RA 10625** states that:

"...Any person, including parties within the PSA Board and the PSA, who breach the confidentiality of information, whether by carelessness, improper behavior, behavior with malicious intent, and use of confidential information for profit, are considered guilty of an offense and shall be liable to fines as prescribed by the PSA Board which shall not be less than Five thousand pesos (P5,000.00) nor more than Ten thousand pesos (P10,000.00) and/or imprisonment of three (3) months but not to exceed one (1) year, subject to the degree of breach of information..."

- ❖ **Republic Act 6713** (Code of Conduct and Ethical Standards for Public Officials and Employees) dated February 20, 1989, Section 7 states that:

"...(c) Disclosure and/or misuse of confidential information. Public officials and employees shall not use or divulge confidential or classified information officially known to them by reason of their office and not made available to the public, either: (1) to further their private interest, or give undue advantage of anyone, or (2) to prejudice the public interest."

Unit of Enumeration

The unit of enumeration for the 2018 CPBI is the **establishment**.

An **establishment** is defined as an economic unit, which engages in one or predominantly one kind of economic activity, under a single ownership or control, i.e. under a single legal entity and at a single fixed physical location. Thus, stores, shops, factories, mining companies, electric plants, transport companies, radio stations, hotels, restaurants, banks, insurance companies, real estate development companies and the like are considered establishments.

However, there are some difficulties in applying the ideal definition so the establishment is defined in operational terms to take into account the organization and record-keeping practices of certain industries by making the single physical location and activity criteria more flexible. This is an inherent characteristic of the industries, namely: construction, transportation and storage, telecommunications, real estate, security and investigation activities, travel agency and tour operator activities, and reservation service and related activities. For these industries, it is then necessary to use the **kind-of-activity unit (KAU)**.

*The **KAU** is “the unit that is engaged in the production of the most homogeneous group of goods and services, usually at one location, but sometimes over a wider area, for which separate records are available that can provide data concerning the production of these goods and services and the materials, labor and physical resources used in this production.”*

A **KAU** differs from the establishment in that there is no restriction with respect to the geographical areas in which a given kind of activity is carried on by a single legal entity.

Given the above concepts, the following are not considered as establishment:

- ✕ Ambulant peddlers, hawkers and movable stalls either along a public road or in a marketplace, as they do not have a fixed business location;
- ✕ Open stalls in shopping centers, malls and markets as they do not have permanency of business location; and
- ✕ Individual professionals and technical workers or craftsmen who do not maintain fixed offices or shops.

Taxonomy of Establishments

1. Economic Organization

The Economic Organization (**EO**) relates to the organizational structure or role of the establishment in the organization. The following are the types of EO:

- a. **Single establishment** (EO=1) is an establishment which has neither branch nor main office. It may have ancillary unit/s, other than main office, located elsewhere.
- b. **Branch only** (EO=2) is an establishment which has a separate main office located elsewhere.
- c. **Establishment and main office** (EO=3) is one where the establishment is located in the same address as the main office and with branch/es elsewhere.

- d. **Main office** (EO=4) is a unit which controls, supervises and directs one or more establishments of an enterprise.
- e. **Ancillary unit other than Main Office** (EO=5) is a unit that operates primarily or exclusively for a related establishment, or group of related establishments, or its parent establishment and provides services that support those establishments.

Examples of ancillary units are warehouses of manufacturing or wholesale and retail trade establishments, garages and repair shops of transport establishments, research laboratories of pharmaceutical companies, and administrative offices which primarily serve their parent units in the Philippines.

2. Legal Organization

The Legal Organization (**LO**) refers to the legal form of the economic entity that owns the establishment. This provides the legal basis for ownership. The following are the types of LO:

- a. **Single Proprietorship** (LO=1) refers to a business establishment organized, owned, and managed by one person, who alone assumes the risk of the business enterprise. A sole proprietorship must apply for a business name and be registered with the Department of Trade and Industry (DTI).
- b. **Partnership** (LO=2) refers to an association of two or more individuals for the conduct of a business enterprise based upon an agreement or contract between or among them to contribute money, property, or industry into a common fund with the intention of dividing profits among themselves.

Corporation refers to an artificial being created by operation of law, having the right of succession, and the powers, attributes and properties expressly authorized by law or incident to its existence. As an artificial being, a corporation has a juridical personality separate and distinct from that of each shareholder or member. It exists only in contemplation of law.

For consistency with other PSA establishment-based surveys, a private corporation will be classified into Government-Owned or Controlled Corporation, Stock Corporation, and Non-stock, Non-Profit Corporation.

- c. **Government Corporation** (LO=3) also called *Government-Owned or Controlled Corporation (GOCC)* refers to a corporation organized for private aim, benefit, or purpose with the government as the majority stockholder, regardless of whether they are stock or non-stock corporations.
- d. **Stock Corporation** (LO=4) refers to an ordinary business corporation organized by private persons, created and operated for the purpose of making

a profit which may be distributed in the form of dividends to stockholders on the basis of their invested capital.

A stock corporation may be a domestic or foreign stock corporation. Domestic Stock Corporation is formed, organized, or existing under the Philippine laws. On the other hand, Foreign Stock Corporation is formed, organized, or existing under any laws other than those of the Philippines and whose laws allow Filipino citizens and corporations to do business in its own country or state.

- e. **Non-Stock, Non-Profit Corporation** (LO=5) refers to a business corporation which does not issue stock to its members and is created not to profit but for the public good and welfare. Of this character are most of the religious, social, charitable, educational, literary, scientific, civic, and political organizations and societies.
- f. **Cooperative** (LO=6) refers to an organization composed primarily of small producers and/or consumers who voluntarily join together to form a business enterprise which they themselves own, control, and patronize. Establishments under this category should be registered to the Cooperative Development Authority (CDA).
- g. **Others** (LO=7) refers to an organization not classified in any of the above classifications. It includes private associations, foundations, Non-Governmental Organizations, or other forms of legal organizations.

3. Industrial Classification

The industrial classification of the unit of enumeration is determined by the activity from which it derives its major income or revenue. The 2009 **Philippine Standard Industrial Classification (PSIC)** was utilized to classify economic units according to their economic activities. It was approved for adoption by government agencies and instrumentalities on February 10, 2010 through the former NSCB Resolution No. 2, series of 2010 which was ratified by PSA Board Resolution No. 01 Series of 2017-158 signed on 14 February 2017.

The 2009 PSIC is a detailed classification of industries prevailing in the country according to the kind of productive activities undertaken by the establishments. It is aligned with the **International Standard Industrial Classification of all Economic Activities (ISIC)** Revision 4, and officially released by the United Nations Statistics Division on August 11, 2008 for adoption by countries in their revised national classifications by 2010.

The structure and coding system of the 2009 PSIC consists of an alpha character and 5 numeric digits. The alpha character represents the **section** (also known as sector), the first two digits represent the **division**; the first three digits, the **group**; the first four digits, the **class**; and all 5 digits, the **sub-class**. Table 1 shows the levels of disaggregation of the 2009 PSIC by section.

4. Size of Establishment

The size of an establishment is determined by its total employment (TE). TE refers to the total number of persons who work in or for the establishment. This includes paid employees, working owners, unpaid workers, and all employees who work full-time or part-time including seasonal workers. Also included are persons on short-term leave such as those on sick, vacation or annual leaves and on strike.

Excluded are workers of establishments who work under a subcontracting arrangement. Workers on a sub-contract agreement or under manpower agencies were included in the report of the sub-contractors or the manpower agencies as part of their total employment.

The following are the size codes with corresponding total employment used in establishment-based censuses and surveys:

SZ Code	Total Employment	SZ Code	Total Employment
0	1 – 4	5	100 – 199
1	5 – 9	6	200 – 499
2	10 – 19	7	500 – 999
3	20 – 49	8	1000 – 1999
4	50 – 99	9	2000 and over

5. Geographic Classification

Establishments are also classified by geographic area using the Philippine Standard Geographic Code (PSGC) classification. The PSGC contains the latest updates on the official number of regions, provinces, cities, municipalities, and barangays in the Philippines. The geographic code used in the 2018 CPBI is in accordance with PSGC as of 31 December 2018.

Based on the latest PSGC, the Philippines has 17 regions, 81 provinces, 145 cities, 1,489 municipalities, and 42,045 barangays.

Scope and Coverage

Only the business operations of establishments confined in the formal sector of the economy were covered in the 2018 CPBI.

The formal sector is comprised of the following:

1. Corporations and partnerships;
2. Cooperatives and foundations;
3. Single proprietorship with employment of 10 and over; and
4. Single proprietorship with branches.

Operationally, the formal sector includes:

1. All establishments with total employment of 10 or more; and
2. All establishments with total employment of less than 10, except those establishments that are under single proprietorship (LO=1) and are single establishments (EO=1) or those which has neither a branch nor a main office. It may have ancillary unit/s other than main office located elsewhere.

Thus, a single establishment (EO=1) with less than 10 employees, but owned or organized either as a partnership, corporation, cooperative or foundation is considered as part of the formal sector and thus is covered in the 2018 CPBI.

Likewise, an establishment owned by a single proprietor with less than 10 employees but with branch/es elsewhere and/or a main office elsewhere is also considered as part of the formal sector.

Specifically, the 2018 CPBI covered formal sector establishments which are engaged in the following economic activities, and with the corresponding types of economic organization (EO) as shown in the following table:

In general, the results of the establishment-based surveys are inputs for the Non-Financial Corporations and Financial Corporations production account of the Philippine System of National Accounts (PSNA). Based on the PSNA concepts, Section O is part of the General Government resources; Section T is part of the Household resources; and, Section U is part of the Rest of the World resources.

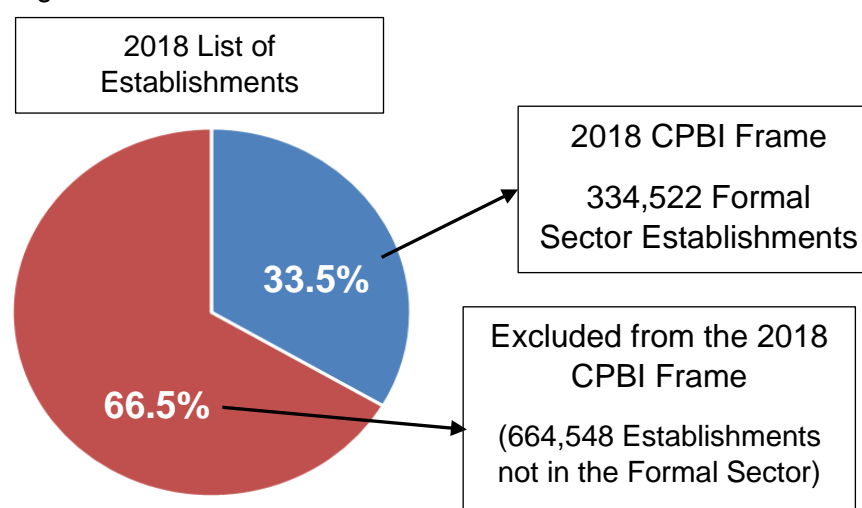

Sampling Frame

The sampling frame for the 2018 CPBI was extracted from the 2018 List of Establishments (LE) as of 01 February 2019.

The 2018 LE is a result of the Updating of the List of Establishments (ULE) which involved a door-to-door canvassing, and inquiry on the basic characteristics of establishments using the Computer-Aided Personal Interview (CAPI) mode of data collection. The 2018 LE operation was conducted by PSA from May to October 2018 primarily to update the sampling frame for the 2018 CPBI.

From a total of 999,070 establishments operating in the country as listed in the 2018 LE as of 1 February 2019, 334,522 (33.5%) comprised the 2018 CPBI frame which includes only those classified as part of the formal sector.

Figure 1. Percent Share of the 2018 CPBI Frame in the LE

Sampling Method

The 2018 CPBI used stratified systematic sampling design with 5-digit PSIC serving as industry strata and total employment as the second stratification variable.

The stratified systematic sampling is a process of which the frame population is divided into several homogeneous groups, called strata. Independent samples are systematically drawn in each stratum based on the computed sampling interval and a random start. This method ensures that all important subgroups of the population are represented in the sample and to further improve the precision of “overall” survey estimates.

*A **certainty stratum** is defined as the stratum whose sampling ratio is 100 percent. In this stratum, all establishments are taken as certainty samples, i.e. the selection probability is 1 and the sampling weight is 1.*

*On the other hand, a **non-certainty stratum** is the stratum where only sample establishments are taken.*

Sampling Units

The sampling unit of the 2018 CPBI is the establishment and, for some sections/industries, the kind-of-activity unit (KAU). For those sections/industries, not considered as with KAUs, the

sampling units are establishments with EO = 1, 2 or 3. On the other hand, for sections/industries with KAU, the sampling units are those establishments with EO = 1, 3 or 4. Table 3 shows the sections/industries with KAUs.

For GOCCs (LO= 3), the sampling units are establishments with EO = 1, 3, and 4, except for those engaged in industries under Sections G and R in which the sampling units are establishments with EO = 1, 2, and 3. The consideration of the type of EOs for the GOCCs is based on the availability of data in the identified sampling units which maintain the records and to ensure completeness of coverage for those with centralized record-keeping.

Sampling Domains

Industry Domain

The industry domain (referred as **industry stratum**) for the 2018 CPBI are the 5-digit level (sub-class) of the 2009 PSIC. For all sections, the industry strata are the same for both establishments with TE of 20 and over, and with TE of less than 20.

Table 4 presents the number of industry strata by 2009 PSIC sections.

Table 4. 2018 CPBI Number of Industry Strata by Section

Section	Number of Industry Strata	Section	Number of Industry Strata	Section	Number of Industry Strata
Total	1,058				
A	86	G	175	M	33
B	22	H	50	N	67
C	420	I	20	P	13
D	2	J	39	Q	20
E	8	K	43	R	15
F	15	L	6	S	24

Employment Stratum

Within the industry domains for each section, the establishments were further stratified by total employment (TE). The TE sizes were either combined or taken as a group to comprise an **employment stratum**. The basic considerations for grouping were the concentration of establishments in each TE sizes and occurrence of stratum jumpers between TE sizes. The number of employment strata formed was five.

Table 5. 2018 CPBI Employment Strata

Employment Strata	SZ Code	Total Employment
1	0 and 1	1 – 9
2	2	10 – 19
3	3	20 – 49
4	4	50 – 99
5	5 to 9	100 and over

The employment strata were also maintained to make it possible to generate MSME statistics based on employment groupings as shown below.

Micro	TE 1 – 9	SZ 0 and 1
Small	TE 10 - 99	SZ 2, 3, and 4
Medium	TE 100- 199	SZ 5
Large	TE 200 and Over	SZ 6, 7, 8, and 9

Geographic Domain

For establishments with TE of 20 and over, the 17 administrative regions serve as the geographic domains; while for establishments with TE of less than 20, the whole country serves as the geographic domain. Table 6 shows the geographic domains for establishments with TE of 20 and over, including the provinces, cities/municipalities that comprise them.

Sample Size and Allocation

The primary consideration in the determination of sample size for the survey was its manageability at the optimum level of estimated budget without compromising the reliability and accuracy of survey results and the timeliness of retrieval of accomplished questionnaires from respondents.

All establishments with TE of 20 or more were taken on a 100 percent basis and comprised the certainty strata, while establishments with TE of less than 20 were taken on sampling basis and comprised the non-certainty strata of TE of 1 to 9, and TE of 10 to 19.

This means that all formal sector establishments with 20 or more employees were all included as sample establishments.

Furthermore, there are some industries which were taken on a 100% basis or take-all. These are industries with relatively small number of establishments, emerging industries and those with special need for data monitoring. Likewise, all establishments engaged in industries under Section B (Mining and Quarrying) and Section D (Electricity, Gas, Steam and Air Conditioning Supply) were also taken as samples.

For each region, the formal sector establishments with less than 20 employees were grouped according to the same 5-digit industry code and within the same TE size group, which are TE of 1 to 9, and TE of 10 to 19. For each group, called stratum, sample establishments were selected to represent the other establishments belonging to the same stratum.

Response Rate

The 2018 CPBI was conducted using a sample size of 60,683 establishments out of the total sampling frame units of 334,522 establishments which were engaged in economic activities classified under the 18 industry sections.

Completed questionnaires/reports from 53,527 responding establishments or 88.2 percent of the total 60,683 samples were the sources of data used in the estimation for the 2018 CPBI major data items. (Table 8)

The non-responding establishments include:

- those which did not submit their accomplished questionnaires;
- those who submitted their questionnaires but there are no entries in all major data items; or
- those who submitted the questionnaires but with remarks as closed, stopped operation, or temporarily stopped operation prior or during the reference year.

Estimation Procedures

The estimate of the total of a characteristic (\hat{X}_s) for the non-certainty employment stratum TE 1 to 9 or TE 10 to 19 in the s^{th} industry domain is

$$\hat{X}_s = \sum_{j=1}^{n_s} W_{sj} x_{sj}$$

where:

s - denotes the non-certainty employment strata in TE of less than 20

x_{sj} = value of the j^{th} establishment in the non-certainty employment stratum TE 1-9 or TE 10-19 in the s^{th} industry domain

$j = 1, 2, 3, \dots, n_s$ establishments

W_{sj} = weight of the j^{th} establishment in the non-certainty employment stratum TE 1-9 or TE 10-19 in the s^{th} industry domain

Sampling weight is computed as:

$$W_{sj} = \frac{N_s}{n_s}$$

where N_s = total number of establishments in the s_{th} industry

n_s = total number of sample establishments in the s_{th} industry

W_{sj} = weight of the j_{th} establishments in the s_{th} industry

Thus, if $n_s = N_s$ (Take all) , then $W_{sj} = 1$ (weights for certainty stratum)

Weight Adjustments

To account for non-response, the adjustment factor (n_s/n'_s) was multiplied to the sampling weight to compute for the adjusted weights W'_{sj} :

$$W'_{sj} = \frac{N_s}{n_s} \frac{n_s}{n'_s} = \frac{N_s}{n'_s}$$

where n'_s = number of responding establishments in the s_{th} industry

W'_{sj} = adjusted weight to account for non-response in the s_{th} industry

To account for stratum jumpers, sampling weights were further adjusted to conform with the reclassified industry class and employment structure after data collection.

Sampling weight was recomputed based on post-stratification after data collection:

$$PW_{sj} = \frac{PN_s}{pn_s}$$

where PN_s = post-stratification total number of establishments in the s_{th} industry

pn_s = post-stratification total number of sample establishments in the s_{th} industry

PW_{sj} = post-stratification weight of the j_{th} establishments in the s_{th} industry

To account for unit non-response after post-stratification, the adjustment factor (pn_s/pn'_s) is multiplied to the sampling weight to compute for the adjusted weights PW'_{sj} :

$$PW'_{sj} = \frac{PN_s}{pn_s} \frac{pn_s}{pn'_s} = \frac{PN_s}{pn'_s}$$

where pn'_s = number of responding establishments in the s_{th} industry

PW'_{sj} = adjusted weight to account for non-response in the s_{th} industry

The estimate of the total characteristic in the s_{th} industry is:

$$\hat{X}_s = \sum_{j=1}^{pn'_s} PW'_{sj} x_{sj}$$

where pn'_s = number of responding establishments in the s_{th} industry

x_{sj} = value of the j_{th} establishments in s_{th} industry

j = 1,2,3,..... pn'_s responding establishments

PW'_{sj} = adjusted weight of the j_{th} establishment in s_{th} industry

Limitations of Data

The results of the 2018 CPBI are estimates representing the frame population covering establishments included in the formal sector category as listed in the PSA's 2018 List of Establishments.

Section 4 of Commonwealth Act No. 591 requires that the data of individual business firms be kept confidential. To avoid disclosure of information of individual establishment, statistical tables do not provide information for any industry group or sub-class wherein the number of establishments is less than three. Figures relating to such industries were either suppressed or combined with those of other related industries in accordance with the guidelines on statistical disclosure control of data for establishments' survey.

Concepts and Definitions

Business/Trade name refers to the name used to identify a commercial product or service, under which a business firm operates. It distinguishes one establishment's/enterprise's products and services from those of its competitors and helps to establish its identity in the marketplace. A business/trade name can be different from the legal name the business has been registered as, for corporate status. This could be the name registered with the DTI, SEC or the name used in securing business permit.

Registered name refers to the name of the establishments/enterprise as registered with the Securities and Exchange Commission (SEC), Department of Trade and Industry (DTI) and Cooperative Development Authority (CDA). Registered name is the one used for taxation purposes and legal matters. Registered name usually links establishments within the same enterprise.

Address refers to the actual physical location of the establishment/enterprise. It should contain the number and street name, building name, floor and room number, barangay, city/municipality and the province.

A **website** is a collection of related web pages containing images, videos or other digital assets. A website is hosted on at least one web server, accessible via a network such as the internet or a private local area network through an Internet address known as a Uniform Resource Locator. All publicly accessible websites collectively constitute the World Wide Web. Web pages are accessed and transported with the Hypertext Transfer Protocol (HTTP), which may optionally employ encryption (HTTP Secure, HTTPS) to provide security and privacy for the user of the web page content. The user's application, often a web browser, renders the page content according to its HTML markup instructions onto a display terminal. One example of a website is <http://www.census.gov.ph>.

Main activity refers to the activity that contributes the biggest or major portion of the gross income or revenue of the establishment/enterprise.

Secondary/Other Activities refer to activities carried out by the establishment/enterprise in addition to the main activity and in which the output, like that of the main activity, must be suitable for delivery outside the establishment/enterprise.

Ancillary Activities refer to activities that exist to support the main productive activities of this establishment by providing non-durable goods or services entirely or primarily for the use of the establishment.

Capital participation refers to the claims of foreign and/or local investors against capital/equity.

Total Employment refers to the total number of persons who work in or for the enterprise as of November 15, 2018. This includes paid employees, working owners, unpaid workers and all employees who work full-time or part-time including seasonal workers. Included also are persons on short term leave such as those on sick, vacation or annual leaves and on strike. **Excluded** from the count of total employment are consultants, home workers, workers receiving pure commission only, workers on indefinite leave, silent or inactive partners and members of cooperative who are not involved in the operation of the cooperative.

Paid employees are all full-time and part-time employees working in or for the establishment/enterprise and receiving regular pay, as well as those working away from the establishment/enterprise and paid by and under the control of the establishment/ enterprise.

Unpaid workers are working owners who do not receive regular pay, apprentices and learners without regular pay, and persons working for at least 1/3 of the working time normal to the establishment/enterprise without regular pay.

Workers on sub-contract agreement or under manpower agencies/contractors are workers employed by the contractors to perform or complete a job, work or service within the premise of this establishment pursuant to a service agreement. These are workers who are not in the payroll of this establishment.

Research and Development (R&D) refers to creative work undertaken as a systematic basis in order to increase the stock of knowledge, including knowledge of man, culture and society, and the use of this stock of knowledge to devise new applications.

R&D personnel are all persons employed directly on R&D as well as those providing direct services such as R&D Managers, administrators and clerical staff. R&D personnel are classified into three categories: researchers, technicians and auxiliary personnel.

Production/construction workers are workers directly engaged in the production/construction process, including working foreman.

Number of hours worked by production/ construction workers refers to the number of hours actually spent by production/construction workers at work, including waiting time and overtime for the whole year of 2018.

Total Income or revenue refers to cash received and receivables for goods sold and services rendered.

Sales to domestic market, for sectors agriculture, forestry and fishing; mining and quarrying; and manufacturing, refer to the products/by-products of the establishment sold to another establishment including, producer, wholesaler and retailer, of a different enterprise. However, for wholesale and retail trade, these refer to the goods sold locally.

Interplant transfers refer to the shipment of products produced to other establishments belonging to the same enterprise as the establishment. These should be valued as though sold.

Direct exports refer to the products produced and shipped, as well as goods sold, directly outside the country by the establishment.

Sales to exporters refers to the products/by-products/goods sold locally to exporters by the establishment.

Sale of goods refers to the income from goods sold in the same condition as purchased.

Net income earned from construction activities abroad refers to the value, cash and receivables of construction activities abroad less total cost incurred.

Net insurance premiums earned are the gross earned premiums on insurance contract less the reinsurers' share of gross earned premiums on insurance contracts.

Contract and commission work done for others refer to the income from outsourcing activities done on materials owned and controlled by another establishment.

The term “**outsourcing**” or production has been used to refer to a situation where the principal production unit (the principal) contracts another production unit (the contractor) to carry out specific functions constituting the whole or a part of the principal's activity in producing a good or a service.

Income from products sold for a construction establishment, is an income from products manufactured and sold, e.g. pre-fabricated products, hollow blocks, etc.

Royalty income is an income received for trademarks, copyrights, patents or secrecy and concessions.

Trademarks are images, logos or other graphical materials associated with a brand and which, if registered as such, may not be reproduced or copied without the permission of the trademark holder.

Copyright is the exclusive right to reproduce articles, books, photographs, films or other representative material usually held by the author or publisher of a work.

Patent is the legal recognition of an invention, which also grants sole right of manufacture and sale for commercial purposes to the patent holder.

Concession is the term that describes a business trading under a contract from a concession stand or area within the premises of another business, or host. A concession is principally a tenant, and the hold is its landlord. Concessions are usually given a degree of exclusivity by its host to allow it the right to retail certain product ranges. Concessions operate under their own branding and heads of terms are negotiated and agreed prior to a solicitor drafting either a license or lease which describes the principal terms under which the parties will operate.

Description of Industries for Manufacturing**SECTION C – MANUFACTURING**

Industry Section C – Manufacturing includes the physical or chemical transformation of materials, substances or components into new products. The raw materials are products of agriculture, forestry, fishing, mining, or quarrying as well as products of other manufacturing activities. Substantial alteration, renovation, or reconstruction of goods is generally considered as manufacturing and not repair.

Manufacturing units are described as plants, factories or mills and characteristically use power-driven machines and materials handling equipment. Units that transform materials into new products by hand, in the worker's home, or sell products made on the same premises from which they are sold are also included. Manufacturing units may process materials or may contract with other units to process their materials for them. Both types of units are included in manufacturing.

The repair and installation of machinery and equipment, formerly classified under the manufacturing of the corresponding type of equipment, is now separately identified in another division which is Repair and Installation of Machinery and Equipment (Division 33) under the 2009 Philippine Standard Industrial Classification. This division includes the specialized repair of goods produced in the manufacturing sector with the aim to restore machinery, equipment, and other products to working order. The provision of general or routine maintenance on such products to ensure they work efficiently and to prevent breakdown and necessary repairs is included. This also includes specialized installation of machinery. However, the installation of equipment that forms an integral part of buildings or similar structures, such as installation of electrical wiring, installation of escalators or installation of air-conditioning systems, is classified as construction.

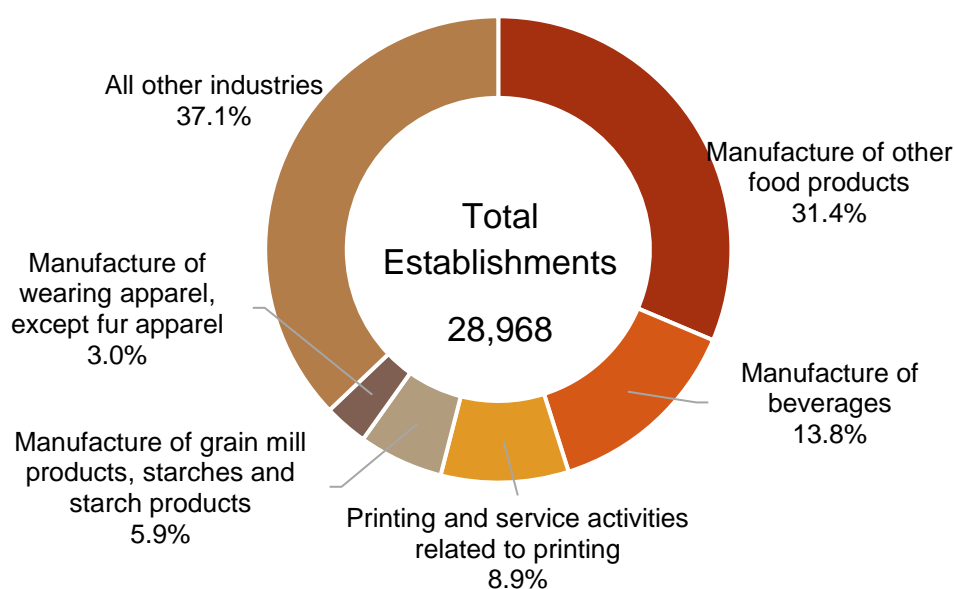

BRIEF ANALYSIS
