FOREWORD

The Agricultural Indicators System (AIS) is one of the statistical indicator frameworks maintained by the Philippine Statistics Authority (PSA). It contains eight modules which are updated and released annually. These modular reports provide measures for assessing socio-economic changes in the agriculture sector, characterizing the agrarian structure of the economy, and situating agriculture in the national economy.

This is the fifth module entitled Agricultural Exports and Imports. It provides indicators on the performance of agricultural sector with respect to trade. It includes the volume and value of exports and imports of selected agricultural crops, share of agriculture in total foreign trade as well as the share of Philippine agricultural crops in the total world export trade. The reference years are 2016 to 2020.

The AIS aims to cover more agricultural development indicators to support the information needs of our data users. We encourage the readers to give their comments and suggestions on the improvement of the AIS, in general, and this report, in particular.

TECHNICAL NOTES

1. The report highlights a five-year data series on exports and imports statistics of selected agricultural crop commodities of the Philippines. The basic data are sourced from the Foreign Trade Statistics compiled by the PSA.
2. Data on volume of exports and imports are in primary/raw form and are expressed in metric tons (MT).
3. The valuation used for foreign trade of agricultural commodities adopts the International Merchandise Trade Statistics (IMTS) framework for both imports and exports. Exports and imports of agricultural commodities utilized the free on board (FOB) value, also known as the cost of goods. FOB is the value of the goods free on board the carrier at the frontier of the exporting country. It includes inland freight, export duty, and other expenses. Ocean freight, insurance, and consular fees, however, are excluded.
4. The valuation is in Philippine Peso (PhP) terms.
5. Data on Philippine and world export values of selected agricultural crop commodities are sourced from the Food and Agriculture Organization.
6. Concepts and Definitions

Exports – all goods leaving the country which are properly cleared through the Customs.

Imports – refer to all goods entering any of the seaports or airports of entry of the Philippines properly cleared through the Customs or remaining under the Customs control, whether the goods are for direct consumption, for merchandising (global manufacturing, global trade in commodities), for warehousing or for further processing.

Foreign trade – a transaction involving the change of ownership of goods and services between residents of a country and the rest of the world.

Growth rates of value and volume of selected agricultural exports or imports – the year-on-year change measures the pace of growth of each of the export or import commodity in terms of value or in volume.

$$\begin{aligned}
 \text{Growth rates of value} \\
 \text{of selected agricultural} \\
 \text{exports and imports} &= \frac{\text{value of agricultural} \\
 &\quad \text{exports and imports} \\
 &\quad \text{in the current year}}{\text{value of agricultural} \\
 &\quad \text{exports and imports} \\
 &\quad \text{in the previous year}} - 1 \times 100\%
 \end{aligned}$$

$$\text{Growth rates of volume of selected agricultural exports and imports} = \frac{\text{volume of agricultural exports and imports in the current year}}{\text{volume of agricultural exports and imports in the previous year}} - 1 \times 100\%$$

Share of agriculture in total foreign trade – indicates the contribution of agricultural products to the country's total export earnings or total import expenditures.

$$\% \text{ Share of agriculture in total exports} = \frac{\text{total value of agricultural exports}}{\text{total value of all exports}} \times 100\%$$

$$\% \text{ Share of agriculture in total imports} = \frac{\text{total value of agricultural imports}}{\text{total value of all imports}} \times 100\%$$

Share of selected Philippine agriculture export commodities in world export trade – indicates the contribution (in terms of value) of the country's selected agricultural export products to the world exports.

$$\% \text{ Share of Philippine agricultural export in world export} = \frac{\text{Value of Philippine agricultural export commodity}}{\text{world export value of the commodity}} \times 100\%$$

AGRICULTURAL EXPORTS AND IMPORTS

The trade performance of the country’s major agricultural commodities is described in terms of the year-on-year changes on the volume and value of agricultural export and import commodities. It also shows the contribution of the agricultural products in the country’s foreign trade and the share of selected agricultural commodities in the world export trade.

Agricultural Exports

The country’s earnings from the exports of agricultural commodities in 2020 summed up to PhP 307.63 billion, recording a decline of -11.0 percent from 2019. Agricultural exports accounted for 9.5 percent of the total export revenues.

In 2020, the volume of rice exports at 0.31 thousand metric tons decreased by -10.1 percent while its corresponding value at PhP 27.59 million grew by 2.8 percent. On the other hand, exports of corn at 1.67 thousand metric tons increased by 302.3 percent and its export value amounting to PhP 238.02 million was up by 278.8 percent from previous year’s level. The earnings generated from the exports of rice and corn shared less than 0.1 percent each in the total value of agricultural exports.

The volume of exported banana at 3.81 million metric tons was reduced by -13.5 percent and its corresponding value at PhP 81.59 billion decreased by -19.4 percent. It registered a 26.5 percent share in the total earnings from agricultural exports. Similarly, the quantity of pineapple exports at 594.73 thousand metric tons, valued at PhP 15.45 billion was down by -5.8 percent and -8.2 percent, respectively. This comprised 5.0 percent in the total receipts from agricultural exports. Mango exports were reduced to 10.66 thousand metric tons amounting to PhP 756.00 million or 0.2 percent of the total value of agricultural exports. It recorded decreases of -25.0 percent in volume and -25.7 percent in value. Exports of tobacco at 32.42 thousand metric tons was worth PhP 6.74 billion. Both its volume and value

- no recorded exports for tomato, ampalaya, and cabbage
Source of basic data: Philippine Statistics Authority

contracted by -19.8 percent and -19.0 percent, respectively. It posted a 2.1 percent share in the total value of agricultural exports.

The volume of rubber exports at 158.33 thousand metric tons increased by 27.4 percent. Its export revenue at PhP 4.87 billion grew by 16.6 percent and accounted for 1.6 percent of the earnings from agricultural exports. A similar trend was observed for abaca exports whose volume increased to 0.11 thousand metric tons or by 16.9 percent. Abaca export earnings at PhP 1.36 billion registered an 11.7 percent increment and resulted in a 0.4 percent contribution to the total agricultural export receipts. For cacao, the volume of exports at 5.15 thousand metric tons worth PhP 677.63 million grew by 69.0 percent and 66.5 percent, respectively. It comprised a 0.2 percent share in the total value of agricultural exports.

Other reference commodities posted shares of less than 0.1 percent in the country's value of agricultural exports. Increasing volume and value of exports were recorded in sugarcane, cassava, and coffee. Meanwhile, decreasing exports both in volume and value were noted for coconut, sweet potato, onion, garlic, eggplant, potato, calamansi, and mongo. Other highlighted crops such as tomato, ampalaya, and cabbage had no exports in 2020. (Tables 1, 2, 2a, and 2b, and Figures 1, 2, 3, and 4)

Agricultural Imports

In 2020, the total expenditures for the imports of agricultural commodities reached PhP 623.98 billion. It registered an -11.0 percent reduction compared to its 2019 level. However, the share of the import values of agricultural products in the total import expenditures went up to 14.0 percent.

Rice imports in 2020 at 2.23 million metric tons contracted by -28.7 percent. Similarly, its value of PhP 43.56 billion declined by -22.1 percent which resulted in a reduced share of 7.0 percent in the total value of agricultural imports. Meanwhile, corn imports increased to 768.53 thousand metric tons or by 67.6 percent. Its value of

AGRICULTURAL EXPORTS AND IMPORTS

PhP 9.91 billion rose by 30.8 percent, recording a higher share of 1.6 percent in the total expenditures for agricultural imports.

Imports of onion in 2020 recovered from the negative performance in the previous year as its volume at 87.53 thousand metric tons amounting to PhP 755.59 million grew by 271.0 percent and 230.0 percent, respectively. Onion imports comprised 0.1 percent in the total expenditures for agricultural imports. A similar trend was observed for coffee imports as its volume at 46.28 thousand metric tons expanded by 31.9 percent and value at PhP 3.63 billion was up by 17.0 percent. It recorded a 0.6 percent share in the total value of agricultural imports. About 41.00 thousand metric tons of mongo were imported in 2020 valued at PhP 1.78 billion. Both its volume and value recorded increments by 11.9 percent and 10.2 percent, respectively. Mongo imports accounted for 0.3 percent to the total import value of agricultural products.

The imports of garlic reached 88.59 thousand metric tons in 2020, higher by 4.0 percent. However, its respective value at PhP 1.18 billion decreased by -6.9 percent. It posted a 0.2 percent contribution in the total value of agricultural imports.

In 2020, the imports of tobacco at 46.50 thousand metric tons valued at PhP 10.06 billion contracted by -12.5 percent and -1.7 percent, respectively. Tobacco imports contributed 1.6 percent to the country's agricultural import expenditures. Imports of rubber at 39.73 thousand metric tons decreased by -29.2 percent and the corresponding value declined to PhP 3.10 billion or by -39.3 percent. Rubber accounted for 0.5 percent in the total expenditures for agricultural imports.

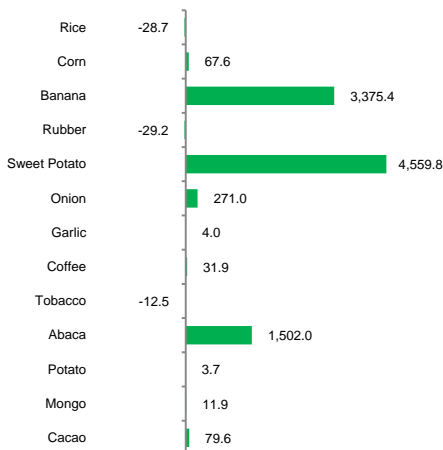

Meanwhile, the contribution of other reference crops such as banana, coconut, sweet potato, potato, and cacao were less than 0.1 percent each to the total expenditures for agricultural

imports. Other crops such as mango, sugarcane, pineapple, cassava, eggplant, tomato, ampalaya, cabbage, and calamansi had no recorded imports in 2020. (Tables 1, 3, 3a, and 3b, and Figures 5, 6, 7, and 8)

Agriculture in the World Export Market

In the world export market, the country recorded a bigger share in the export earnings from coconut products. The share of copra cake in the world export earnings was reduced to 52.3 percent in 2019. On the other hand, increasing shares were noted in desiccated coconut at 41.2 percent, and coconut (copra) oil at 40.4 percent. Similarly, the shares of other commodities went up to 14.4 percent for banana, 14.7 percent for pineapple, 20.9 percent for canned pineapple, and 1.6 percent for unmanufactured tobacco. Minimal share of less than 0.1 percent was noted in dry natural rubber and centrifugal raw sugar. (Table 4 and Figure 9)
