

FOREWORD

This publication entitled “Updated Production Costs and Returns of Selected Agricultural Commodities” is the 10th edition released every other year by the Bureau of Agricultural Statistics (BAS). It is being published in two parts, namely: Part I presents the Updated Costs and Returns of Palay and Corn Production and Part II refers to Updated Costs and Returns of Production of Other Commodities. For this year’s publication, the reference period only cover two (2) years, 2009 and 2010.

As before, data are disaggregated at the national and regional levels. For palay, data are presented by ecosystem, that is, irrigated and non-irrigated and by season, dry and wet seasons. Data for corn are presented by croptype, i.e, yellow and white and for only one cropping season. The summary of findings contained in this report focuses only on 2010 data.

The assumptions used in updating the costs of production are based on current levels of production/yield and prices of inputs and outputs. Gross returns are derived using the current yield level and average price of output per kilogram. The results of the 2009 Survey of Costs and Returns of Palay and Corn Production were used in updating the input structure for the year 2010.

The BAS welcomes comments and suggestions from clients and researchers for further improvement of the BAS updating system.

ROMEO S. RECIDE
Director

**ASSUMPTIONS AND PROCEDURES USED IN UPDATING
THE COST OF PRODUCTION FOR PALAY AND CORN**

ITEM	BASIS/PROCEDURE
1. Cost of seeds/planting materials (cash and non-cash)))
2. Irrigation fee) movement of the farmgate price
3. Lease rental)
4. Rental value of owned land)
5. Landlord's share)
6. Harvester/thresher/sheller's share	- movement of the gross value of production per hectare
7. Cost of fertilizer	- quantity used from the results of 2009 survey of Costs and Returns of Palay and Corn multiplied by the retail price of urea from Weekly Price Monitoring Survey (AMSAD)
8. Cost of pesticide Solid Liquid	- movement of the retail price for selected pesticides quantity used from the results of 2009 survey of Costs and Returns of Palay and Corn multiplied by the retail price of selected pesticides from the Monthly Farm Price Survey
9. Soil ameliorants and other inputs	- movement of the retail price of fertilizer
10. Cost of mulching materials	- movement of the retail price of fertilizer
11. Labor costs (hired, unpaid operator and family and exchange labor)	- number of mandays from the results of the 2009 Survey of Costs and Returns of Palay and Corn multiplied by the nominal wage rate from the Agricultural Labor Survey (ALS)
12. Rentals (tools, equipment, machine and animals)	- movement of agricultural wage rates
13. Food cost	- movement of CPI for food
14. Transport cost	- movement of CPI for transport
15. Fuel and oil	- movement of CPI for fuel and oil
16. Repair cost	- movement of CPI for minor repairs
17. Interest on crop loans	- increase of 10 percent per annum based on the average 5-year interest rate for agricultural loans
18. Other production costs	- movement of CPI for all items
19. Depreciation cost	- increase of 10 percent per annum based on the FAO normal rate of obsolescence for tangible fixed assets
20. Interest on operating capital	- 16 percent of total cash costs of seeds, fertilizer, chemicals and paid labor based on the average BSP investment rates like savings, time deposits, etc.
21. Land tax	- increase of one (1) percent per annum

SUMMARY OF FINDINGS

ALL PALAY

- In 2010, the average costs of palay production was P39,300 per hectare. It was higher in the dry season cropping at P40,264. Production in the wet season entailed P38,228 per hectare.
- Palay farmers in the Philippines grossed an average of P53,859 per hectare. The dry season cropping recorded gross receipts of P55,546; this was P3,288 higher than gross returns of P52,258 in the wet season cropping.
- Net returns averaged P14,559 per hectare for all palay. This corresponded to P15,282 for the dry season cropping and P14,030 for the wet season cropping.
- On the average, palay producers earned P0.37 for every peso of investment in production during the year. Net profit-cost ratio was 0.37 in the wet season production. It was 0.38 in the dry season.
- Per kilogram, the average farmgate price was P14.87 and the cost of production was P10.85. Palay was sold at a higher price during the dry season at P15.26 and cost was P11.06. During the wet season, the average price received was P14.48 per kilogram and cost was P10.59.
- Among the regions, CAR recorded the highest cost of production at P49,807 per hectare while it was lowest in Eastern Visayas at P28,498. The average cost of production during the dry season was also highest in CAR at P54,083 per hectare. It was relatively lower in Bicol Region, Central Visayas and Eastern Visayas. Wet season cropping entailed the highest cost in Davao Region at P48,001 per hectare.
- Across regions, palay farmers in Central Luzon grossed the highest at P67,152 hectare. The lowest gross returns were recorded in Eastern Visayas at P43,170 per hectare. Dry season production in Central Luzon indicated the highest gross returns at P81,658 while the least at P39,883 was noted in Central Visayas.
- Net returns realized were biggest in Northern Mindanao at P23,670 while Cagayan Valley and ARMM palay farmers realized net returns below P10,000 per hectare each. CAR registered a net loss of P237 per hectare during the period. Central Luzon farmers earned the biggest at P29,331 per hectare during the dry season while CAR farmers got the least at

P1,382 hectare. In the wet season cropping, Northern Mindanao netted P25,803 per hectare. CAR and Cagayan Valley netted P3,893 per hectare and P3,997 per hectare, respectively.

- In terms of net profit-cost ratio, Eastern Visayas was on top at 0.71 and Cagayan Valley was at the bottom at 0.13. During the dry season, Zamboanga Peninsula had the highest net profit-cost ratio at 0.73 while CAR had the lowest at 0.03. Eastern Visayas topped during the wet season at 0.75 while CAR and Cagayan Valley recorded the lowest at 0.09.
- On the average, cost per kilogram of palay farmers in CAR was highest at P14.56 while price was lower at P14.49 per kilogram. Eastern Visayas had the least cost at P8.15 per kilogram while average price received was P13.95.
- During the dry season, it was still CAR that recorded the highest cost of P14.35 per kilogram while palay was priced P14.72. The least cost was noted in Eastern Visayas at P8.45 per kilogram while palay was sold at P14.35. In the wet season cropping, Cagayan Valley incurred the highest cost at P13.24 per kilogram while price received was P14.43.

IRRIGATED PALAY

- Costs incurred in irrigated palay production averaged P42,704 per hectare. Dry season cropping entailed higher costs at P44,253. Palay production in wet season incurred lower cost at P41,201.
- Irrigated palay farms grossed an average of P59,272 per hectare. It was higher in dry season cropping at P61,498 compared with wet season cropping which recorded P57,196.
- Average net profit from irrigated palay production amounted to P16,568 per hectare. Palay farmers realized higher net returns in dry season cropping at P17,245. Wet season cropping generated net returns of P15,995.
- Net profit-cost ratio was 0.39 in both seasons.
- Per kilogram, average cost of production was P10.71. By season, it was P10.98 in the dry season and P10.43 in the wet season. Farmgate price in 2010 averaged P14.87 per kilogram. It was higher in the dry season at P15.26 than in the wet season which recorded P14.48.

- On the average, production cost for irrigated palay farms was highest in CAR at P52,873 per hectare. It was lowest in Central Visayas at P32,627. CAR registered the highest cost for the dry season cropping at P56,514 while Central Visayas had the lowest at P31,241.
- For wet season cropping, Davao Region posted the highest cost at P48,832 per hectare and Eastern Visayas the least at P31,340.
- Among regions, gross value of palay production was highest in Central Luzon at P70,047 per hectare. The least grosser was Caraga at P46,760 per hectare. For dry season cropping, Central Luzon was the top grosser with P81,722. Caraga was the least with P46,830. For wet season cropping, Northern Mindanao recorded the highest gross receipts at P66,603 and Caraga had the lowest at P46,670.
- Net returns were highest in Zamboanga Peninsula at P27,196 per hectare. Central Luzon palay farmers earned highest during the dry season cropping at P29,342 per hectare. A net loss was recorded in CAR.
- In wet season cropping, net returns were higher in Eastern Visayas and Northern Mindanao earning more than P26,000 per hectare each. CAR and Cagayan Valley had net returns of less than P6,000 each per hectare.
- In terms of net profit-cost ratio, the highest was noted in Zamboanga Peninsula at 0.76 and the lowest was in CAR at 0.01. For dry season, net profit-cost ratio was highest in Zamboanga Peninsula at 0.83. CAR had net-loss ratio of 0.01. In the wet season cropping, Eastern Visayas was on top with net profit-cost ratio of 0.85 while CAR and Cagayan Valley had the lowest at 0.12, respectively.
- Average cost per kilogram was highest in CAR at P14.39. In Eastern Visayas and Zamboanga Peninsula production entailed costs of less than P9.00. CAR recorded its highest cost in the dry season cropping at P14.84. It was lowest in Zamboanga Peninsula at P8.56.
- Palay was priced highest in Central Visayas across all seasons at an average of P16.26 per kilogram. Bicol recorded the lowest farmgate price at P13.65 per kilogram. The dry season price was P13.78 per kilogram. Meanwhile, it was in CALABARZON where the lowest farmgate price was quoted in the wet season at P13.21 per kilogram.

NON-IRRIGATED PALAY

- The average cost of production in non-irrigated farms was P31,823 per hectare. Production cost was higher in wet season cropping at P33,742. The dry season cropping cost P29,994.
- Non-irrigated palay farms grossed an average of P39,019 per hectare. Gross receipts were highest during the wet season at P43,295. Dry season cropping grossed P37,234.
- Net returns from non-irrigated farms averaged P7,196 per hectare. Wet season cropping netted P9,553 and dry season cropping recorded net returns of P7,240.
- On the average, net profit-cost ratio was 0.23 and this was higher in the wet season cropping at 0.28. In dry season cropping, net profit-cost ratio stood at 0.24.
- The cost of producing non-irrigated palay was P12.13 per kilogram. It was lower in the wet season cropping at P11.28 per kilogram. Dry season cropping cost P12.29 per kilogram. Farmgate price of palay in 2010 averaged P14.87 per kilogram. It was higher in dry season at P15.26 per kilogram. During wet season, palay was priced P14.48 per kilogram.
- Ilocos Region posted the biggest production cost at an average of P45,089 per hectare. Eastern Visayas had the lowest cost at P24,876 per hectare. This situation was true for both dry and wet seasons.
- Among regions, Ilocos Region grossed the highest at P52,043 per hectare. The lowest was recorded in Cagayan Valley at P25,720 per hectare. Ilocos Region grossed the highest for both dry and wet season croppings. Cagayan Valley came down with the least gross returns.
- Zamboanga Peninsula recorded the highest net returns at P14,402 per hectare. Its wet season cropping cost P13,430. Central Luzon farmers recorded the highest net returns in dry season cropping at P18,175 per hectare.
- The highest net profit-cost ratio was registered in Eastern Visayas at 0.54. This held true for both cropping seasons.
- Cagayan Valley farmers had an average production cost of P19.83 per kilogram. The same region had the highest cost for both seasons. The cost of producing palay was lowest in Eastern Visayas at an average of P9.07 per kilogram.

- In 2010, the average farmgate price was highest in Central Visayas at P16.26 per kilogram. This region also had the highest prices at P16.46 in the dry season and P16.07 in the wet season.

ALL CORN

- The average cost of corn production amounted to P23,665 per hectare in 2010. Gross returns averaged P28,506.
- Net returns realized were P4,841 per hectare. On the average, a farmer earned P0.20 for every peso of investment in corn production.
- Per kilogram, the average cost incurred was P9.27 while farmgate price was P11.17.
- Among the regions, Ilocos Region had the highest cost of production at P44,663 per hectare while Central Visayas incurred the least at P12,989.
- Ilocos Region recorded the highest gross receipts at P58,048 per hectare. The lowest was noted in Central Visayas at P11,068.
- Ilocos was still on top in terms of net returns at P13,385 per hectare while Central Visayas recorded a net loss of P1,921.
- CALABARZON, meanwhile, posted the highest net profit-cost ratio at 0.70. Central Visayas had a net loss-cost ratio of 0.15.
- Per kilogram, Central Visayas incurred the highest cost at P15.73 and CALABARZON, the lowest at P6.48. On the average, farmgate price of corn was highest in Central Visayas at P13.40 per kilogram and the lowest was in ARMM at P9.67.

WHITE CORN

- White corn production in the Philippines entailed an average cost of P17,272 per hectare. It generated gross earnings of P17,820.
- Net returns realized averaged P548 per hectare. White corn production had a net profit-cost ratio of 0.03.
- Per kilogram, average production cost was P10.66 while farmgate price stood at P11.00.

- Ilocos Region incurred the highest cost at P35,943 per hectare and the lowest was recorded in Eastern Visayas at P6,719.
- Across regions, white corn farmers in Ilocos Region grossed the highest at P48,236 per hectare while Bicol had the lowest at P8,232.
- In Ilocos Region, net returns was highest recorded at P12,293 per hectare. White corn farmers in Cagayan Valley, Bicol, Central Visayas and Davao Region incurred net losses during the period.
- In terms of net profit-cost ratio, CALABARZON got the highest at 0.72 while Cagayan Valley, Bicol, Central Visayas and Davao Region registered net loss-cost ratios of 0.03 to 0.21.
- Average cost of production per kilogram was highest in Central Visayas at P15.87 and the lowest in Eastern Visayas at P4.97.
- White corn was priced highest in Ilocos Region at P16.10 per kilogram and the lowest was quoted in Cagayan Valley at P8.88.

YELLOW CORN

- The average cost of yellow corn production was P32,587 per hectare. Average gross earnings amounted to P40,840.
- Net returns averaged P8,253 per hectare. Farmers in the country earned P0.25 for every peso invested in producing yellow corn.
- On a per kilogram basis, average cost was P8.98 and farmgate price was P11.26.
- Production cost was highest in Ilocos Region at P44,570 per hectare. Central Visayas registered the lowest at P8,361.
- Across regions, average gross earnings were highest in Central Luzon at P61,659 per hectare while the lowest was recorded in Central Visayas at P20,433.
- Corn farmers in Central Luzon posted the biggest net returns at P23,262 per hectare. Western Visayas had the lowest at P4,831.

- Farmers in Central Visayas netted an average of P1.44 for every peso of investment in yellow corn production while those in Western Visayas netted P0.17.
- Per kilogram, yellow corn production entailed higher cost in Western Visayas at P9.90. In Central Visayas, it was P3.74. Farmgate price in Western Visayas was P11.61 per kilogram. It was lowest in Central Visayas at P9.13.

SUMMARY TABLES
