# FOREWORD

---

The 2009 Commodity Fact Sheets is the 16<sup>th</sup> edition of this statistical report which is published annually by the Bureau of Agricultural Statistics (BAS). The report is a compilation of basic statistical information about the selected agricultural commodities. It covers 50 commodities classified into food and non-food crops, livestock and poultry and fisheries.

Each commodity profile is presented in a one-page fact sheet which describes the commodity in terms of number of farms, production, area, yield, share in gross output in agriculture, prices, cost of production, exports and imports and domestic utilization. The report serves as a quick yet comprehensive reference material for the agricultural data users.

The BAS welcomes comments and suggestions from our clientele for further improvement of the content and coverage of this report.

## EXPLANATORY NOTES

---

---

1. Data on the number of farms are taken from the results of the 2002 Census of Agriculture.
2. Volume of production is expressed in metric tons and value of production is expressed in pesos. The values of commodities at current prices are taken from the Performance of Philippine Agriculture, a quarterly report published by the BAS. For commodities not highlighted in the Performance Report, the values are derived by multiplying the year's volume of production with the average farmgate price in the same year.
3. The share in Gross Output in Agriculture is provided only for the commodities highlighted in the Performance Report. It is derived by dividing the value of production of the selected commodities by the total value of agricultural production at constant prices.
4. Major locations are the top producing provinces based on harvested area.
5. Major producers are the top producing provinces based on volume of production.
6. Provinces with highest yield are provinces with the biggest production per hectare or per bearing tree.
7. Data on volume of exports and imports are expressed in net metric tons. The data on value are FOB value for exports and CIF value for imports expressed in peso terms.
8. Major markets/suppliers are the top exporting/importing countries based on volume. The following are the country specifications:
  - China, People's Republic of
  - Japan excludes Okinawa
  - Korea, Republic of South
  - Indonesia includes West Irian
  - Iran, Islamic Republic of
  - Malaysia, Federation of Malaya
  - Marshall Islands, Republic of
  - Myanmar, Union of (Burma)
  - New Zealand excludes Western Samoa
  - Palau, Republic of
  - South Africa, Republic of
  - Taiwan, Republic of China
9. Data on domestic consumption are represented by net food disposable (NFD) and quantity of commodity that goes to processing. These data are generated by the Supply and Utilization Accounts for Agriculture. NFD is the amount of food available

## EXPLANATORY NOTES

---

in its original (unprocessed) form for human consumption. This is usually equated or made equivalent to the quantity consumed.

10. Values of commodities for food use (NFD) and processing are derived using the average retail and wholesale prices, respectively. Valuation is done only for commodities with available prices. These are commodities which are included in the national market baskets of the BAS' price data system.
11. The following abbreviations are used in the report:

<b>P</b>	Peso
<b>m.t.</b>	Metric Ton
<b>kg(s).</b>	Kilogram/s
<b>has.</b>	Hectares

12. The sources of data are the following:

National Statistics Office (NSO) – Number of farms and foreign trade statistics

Bureau of Agricultural Statistics (BAS)

Crops Statistics Division (CSD) – Area and volume of production of crops

Livestock and Poultry Statistics Division (LPSD) – Population and production of cattle, hog, goat, chicken and duck, and production of chicken and duck eggs

Fisheries Statistics Division (FSD) – Volume and value of production of fish, crustaceans and molluscs

Agricultural Marketing Statistics Analysis Division (AMSAD) – Farmgate, wholesale and retail prices

Agricultural Accounts and Statistical Indicators Division (AASID) – Domestic consumption, cost of production and share in gross output in agriculture

# CEREALS

# PALAY/RICE

## NUMBER OF FARMS

2,149,971

## AREA

Historical Average (2000-2009): 4,177,844 has.  
2009: 4,532,310 has.  
Major Locations: Nueva Ecija (6.5%), Iloilo (6.2%), Isabela (5.9%)

## PRODUCTION (Palay)

Historical Average (2000-2009): 14,586,347 m.t.  
2009: 16,266,417 m.t.  
Value: P238,140.39 million  
Major Producers: Nueva Ecija (8.4%), Isabela (6.7%), Iloilo (5.8%)

## YIELD

Historical Average (2000-2009): 3.49 m.t./ha.  
2009: 3.59 m.t./ha.  
Provinces with Highest Yield: Davao del Sur (5.13 m.t./ha.), Nueva Ecija (4.60 m.t./ha.),  
Biliran (4.58 m.t./ha.)

## SHARE IN GROSS OUTPUT IN AGRICULTURE

16.14%

## PRICE

Farmgate (Palay): Fancy, dry (P14.28/kg.), Other variety, dry (P14.63/kg.)  
Wholesale (Rice): Fancy (P38.44/kg.), Premium (P34.54/kg.),  
Well milled (P31.17/kg.), Regular milled (P28.25/kg.)  
Retail (Rice): Fancy (P42.84/kg.), Premium (P37.63/kg.),  
Well milled (P34.12/kg.), Regular milled (P30.69/kg.)

## AVERAGE COST OF PRODUCTION PER KILOGRAM

All types (P10.17), Irrigated (P9.94), Non-irrigated (P10.60)

## IMPORTS

Volume:	<b><u>Rice/fragrant rice/glutinous/other rice</u></b> 1,732,280.45 m.t.	<b><u>Rice flour</u></b> 3,331.29 m.t.
Value:	P48,774.73 million	P42.80 million
