FOREWORD

Commodity Fact Sheets 2014 is the 21st edition of the annual publication released by the Philippine Statistics Authority (PSA). The report is a compilation of basic statistical information on the selected agricultural commodities. It covers 50 commodities classified into food and non-food crops, livestock and poultry and fisheries.

Each commodity profile contains the following information: number of farms, production, hectarage, yield, share in gross output in agriculture, prices, costs of production, exports, imports, trade balance and domestic utilization.

The report aims to serve as a quick yet comprehensive reference material for the various data users and stakeholders in the agriculture sector. The PSA hopes to further improve the content and coverage of this report. Thus, readers are encouraged to give their comments and suggestions to make the report more useful and relevant.

EXPLANATORY NOTES

1. Data on the number of farms are taken from the results of the 2002 Census of Agriculture.
2. Volume of production is expressed in metric tons and value of production is expressed in pesos. The values of commodities at current prices are taken from the Performance of Philippine Agriculture, a quarterly report published by the PSA. For commodities not highlighted in the Performance Report, the values are derived by multiplying the year's volume of production with the average farmgate price in the same year.
3. The share in Gross Output in Agriculture is provided only for the commodities highlighted in the Performance of Philippine Agriculture. It is derived by dividing the value of production of the selected commodities by the total value of agricultural production at constant prices.
4. Major locations are the top producing provinces based on harvested area.
5. Major producers are the top producing provinces based on volume of production.
6. Provinces with highest yield are provinces with the biggest production per hectare or per bearing tree.
7. Data on cost of production per kilogram are updated estimates based on given set of assumptions and procedures. The costs of production of temporary crops are expenses incurred in production during the period while those of permanent crops refer to maintenance costs of the farms.
8. Data on volume of exports and imports are expressed in net metric tons. The data on value are FOB value for exports and CIF value for imports expressed in peso terms.
9. Trade balance is equal to the total value of exports less total value of imports. A positive trade balance indicates trade surplus and negative trade balance implies trade deficit.
10. Major markets/suppliers are the top exporting/importing countries based on volume. The following are the country specifications:

Brunei Darussalam
China, People's Republic of
Czech Republic (Czechoslovakia)
Japan excludes Okinawa
Korea, Republic of South
Indonesia includes West Irian
Iran, Islamic Republic of
Macau (Portuguese Asia)
Malaysia, Federation of Malaya
Marshall Islands, Republic of
Micronesia, Federated States of
Myanmar, Union of (Burma)
New Zealand excludes Western Samoa
Palau, Republic of
South Africa, Republic of
Taiwan, Republic of China
Tanzania, Republic of

11. Data on domestic consumption are represented by net food disposable (NFD) and quantity of commodity that goes to processing. These data are generated by the Supply Utilization Accounts for Agriculture. NFD is the amount of food available in its original (unprocessed) form for human consumption. This is usually equated or made equivalent to the quantity consumed. Net food disposable (NFD) is the balance or the remainder after all the "use" parameters are taken into account.
12. Values of commodities for food use (NFD) and processing are derived using the average retail and wholesale prices, respectively. Valuation is done only for commodities with available prices. These are commodities which are included in the national market baskets of the PSA price data system.
13. The following abbreviations are used in the report:

<i>P</i>	<i>Peso</i>
<i>m.t.</i>	<i>Metric Ton</i>
<i>kg(s).</i>	<i>Kilogram/s</i>
<i>has.</i>	<i>Hectares</i>
14. All data items in the report are sourced from the different divisions of the Philippine Statistics Authority.
