<sup>a/</sup> Actual data as of December 2021, or most recent available data.

<sup>b/</sup> May either be the cumulative or incremental target value at the end of the plan period.

<sup>c/</sup> NEDA Board Committees/Cabinet Cluster/IACs responsible for outcomes, and the implementing agencies responsible for delivering the outputs.

<sup>d/</sup> Lead/ responsible agency for reporting progress on indicator targets.

<sup>e/</sup> These include MPAs without consolidated data, without assessment yet or have incomplete data due to absence of permanent monitoring plots/blocs, among others.

<sup>f/</sup> Areas are considered water constraint when water extraction already exceeded allowable extraction rate. These include groundwater sub-areas that are fully allocated or nearly fully allocated.

\* Figure is based on the projection submitted by NEDA.

<sup>Σ</sup> End-of-Plan Target is the sum of the annual targets from 2023 to 2028.
